Talks on forming Italian government close to collapse

Antonio Maccanico's prospects of forming Italy's 55th post-war government looked increasingly remote after almost two weeks of talks failed to find a common position between the two main alliances, on the centre-left and on the right. If Mr Maccanico cannot form a government, President Oscar Luigi Scalfaro will have two options: dissolving narliament or asking outgoing premier Lamberto Dini to head a caretaker government, Page 20

fixing of the D-Mark and French franc exchange rates, or even a full monetary union between the two countries, have surfaced several times in recent weeks as doubts about the ability of France and Germany to meet the Maastricht entry criteria for 1999 have grown.

changes tack over rescue deal By William Lewis and Geoff Dyer in London and David Buchan in Paris

> Eurotunnel, the Anglo-French operator of the Channel tunnel, admitted for the first time yesterday that any resolution to its financial crisis would probably involve swapping part of the banks' debt for some of the shareholders' equity.

The company's statement represents a retreat from its opening shot made at the beginning of negotiations with its banks in October, when it assured sharebolders that it would not be proposing a "massive" debt-for-equity swap.

Analysts described the statement, the first since the talks began, as a U-turn. However, Sir Alastair Morton, co-chairman of Eurotunnel, insisted he had pre-viously conceded that a debt-forequity swap could form part of a wider-reaching financial settle-

ment. The company is currently in a standstill agreement with its banks, under which it does not have to pay the interest on lts £8bn (\$12.3bn) debt. Since the start of the talks, the banks have failed to make any public statements on what sort of arrangement they might be prepared to accept

NEWS: EUROPE

Moscow sees TV selling role for IMF chief

By Chrystia Freeland in Moscow

The Russian government has invited Mr Michel Camdessus, international Monetary Fund director, to help sell market reforms to the public by appearing on television when he comes to Moscow next week.

It wants to use him "as a publicist for financial stabilisation". said Mr Sergel Aleksash-enko. deputy chairman of the Russian central bank. However. Mr Camdessus had not yet decided whether to take up

the Kremlin's unusual offer. The IMF chief is scheduled to visit Moscow next week in a trip which the Russian authorities hope will wrap up negotia-tions successfully between Russia and the Fund for a three-year, \$9bn loan.

But, just four months before presidential elections, the IMF talks come at an awkward time for President Boris Yeltsin, who must convince the disgruntled Russian people that the long term benefits of last year's austere economic reforms outweigh their initially painful side-effects.

The Kremlin appears to be hoping that a televised endorsement from Mr Camdessus, whose institution is regularly accused in the leftwing and nationalist press of seeking to destroy the Russian economy, will help win over voters to market reforms.

If Mr Camdessus takes up the Kremlin's offer be will jump on the bandwagon of for-eign leaders who have sought to bolster Mr Yeltsin ahead of the presidential elections.

The boldest backing thus far has come from Mr Alain Juppé, the French prime minister, who yesterday urged Russian voters to appreciate the accomplishments of Mr Yeltsin's market reforms. In an inter view with Izvestia, the national daily, Mr Juppe said: "Russla faces an important political date. It will be up to the Russian people to choose. If I may voice a wish, it is that the electioo campaign should be an opportunity to give credit to the reforms accomplished by President Yeltsin."

But the Communist triumph in last December's parliameotary elections, and more recent opinion polls, suggest that the electorate is tired of reforms

By Michael Lindemann in Bonn Mr Klaus Zwickel, the leader of Germany's powerful IG Metall engineering union, pledged ahead of talks with Chancellor Helmut Kohl last night that the union would only give up the present early retirement scheme if an alternative solution would not aggravate rising unemployment.

"We need early retirement." he told about 20,000 demonstrators at a rally in Bonn's Min-ster Square. "If there is to be another measure it has to be as positive an effect on the labour market as the present system of early retirement." Mr Zwickel said.

Mr Zwickel was due to join Mr Kohl, several ministers and the representatives of Germany's employers' associations in another round of talks on creating jobs.

This meeting will discuss an overhaul of the early retirement scheme, a subject which has become particularly press ing after the government announced last week that 4.16m people were now out of work, a post-war record. There are fears that unless something can be done to stem the number of people retiring early, the scheme will put Germany's pension system under intolerahle financial strain.

The demonstration in Bonn coincided with an admission by Mr Norhert Blüm, the lahour minister, that people should take out a second pensions scheme because payments from the existing system were likely to decline if

Members of the Germany's IG Metall engineering union protesting in Bonn yesterday in support of their early retirement rights neur

unemployment continued on its upwards trend. "The system starts approaching its limits if unemployment rises considerably," Mr Blum told the Bild hibitive.

Zeitung newspaper. Mr Zwickel, meanwhile, also warned the government that 3 solution had to be found to the question of overtime, which IG Metall insists must be While the outcome of the later early retirement is funded restricted in order to create est talks remained unclear, largely by the government,

there were signs that the two new johs. Companies argue sides might reach a comprothat they have to work overtime hecause the costs of mise. A spokesman for Mr Blüm, who has been roundly blamed for the sudden confuhiring extra workers are prosion abont the early retirement "We cannot allow that fewer and fewer people work more and more and more and more scheme, said the minister would not be "dogmatic" on have no work at all," he told

the matter Mr Blum insists that because

with only relatively small contributions by the former employers, the system was never designed to cope with rising unemployment levels.

The unions, however, insist that the present system enables older workers to retire earlier, creating new jobs for younger ones who would otherwise never get a joh.

EUROPEAN NEWS DIGEST **French** bishops approve condoms

French Roman Catholic hishops have for the first time approved the use of the condom to prevent the spread of the HIV virus, countering the doctrine of Pope John Paul.

In a statement issued yesterday, the social committee of the bishops of France said the condom could be "necessary" to protect against the virus, which may lead to Aids, but warned against making "the sexual act commonplace". Use of condoms should oot exempt people from reflecting upon "the human character of sexuality": it was understandable "to avoid a serious risk", but the condom was not an educational instrument for adult sexuality.

The president of France's Catholic Committee of French doctors, Professor March Gentilini, called the move "a breakthrough". He said that as far as the church was concerned, "the word condom is no longer taboo". According to the World Health Organisation, registered cases of Aids in France have exceeded 35,000 since 1978. AFP. Part AFP, Paris

Contest launched to design euro

A competition to design the new bank notes for the euro, the proposed European single currency, was launched yesterday by the European Monetary Institute, forerunner of the European Central Bank. The designs must be based on one of two themes: either a "traditional" approach based on the theme "Ages and styles of Europe" reflecting Europe's cultural heritage, or an abstract or contemporary theme. Under tha "traditional" approach, "one side of each banknote will show features – which could be portraits – representing a certain age whereas the other side will display an architectural feature from the same period", the EMI said.

The EMI is looking for ideas for the design of the seven lenominations in the euro bank note series - the 5.10. 20, 50, 100, 200 and 500 euro notes. The competition is open only to "experienced bank note designers" selected hy national central banks. The designs must allow for "several advanced security features" to help prevent counterfeiting. The competition closes on September 13. Graham Bowley. Lo Graham Boucky, London

Greek telecom sell-off dispute

Workers at the Greek state telecom operator, OTE, will stage a 24-hour strike today to protest against the Socialist government's plan to float 6 per cent of the company.

OTE's union has pledged to stage rolling strikes during debate in parliament of a hill allowing a share sale ou the Athens bourse which may begin next week. Under the bill, OTE's share capital will increase hy 6.034 per cent. Most shares will be sold in a public offer, with an undetermined percentage going to staff and pensioners.

Earlier attempts to part-sell OTE in 1993 and 1994 fell flat amid union opposition. In November 1994 another plan was ditched when foreign investors made low prire proposals. Later deadlines for the 25 per cent sale were broken. In the latest attempt, which the government wants to end by May, underwriters will set a price which the bill says could fall up to 8 per cent below that based on the company's still undisclosed valuation. A price range unofficially quoted at a closed-doors presentation of the company last week was Dr3,700 (£10) to Dr4,100 a share. Reuter, Ather Reuter, Athens

France forecasts 1996 growth

This year's growth in the French economy will be "probably oearer 1.5 per ceot than 2 per cent", according to Mr Alain Lamassoure, the budget minister. This is the most precise forecast the government has given of its re-estimate of 1996 growth in the wake of last December's strikes and economic slowdown, although it is not due to publish a new official forecast until next mooth.

The budget minister played down the impact of slower growth on tax revenue. He pointed out that in drafting its 1996 budget, to which it had attached a 2.8 per cent growth estimate for the economy, the government had assumed tax receipts would only rise by 1.8 per cent. David Buchon, Paris

and is ready to back higher government spending.

In an effort to cater to the new mood, over the past few weeks Mr Yeltsin has made a spate of spending promises, which some analysts have calculated add up to almost \$300 for each voter. However, Mr Aleksashenko

insisted that the president's new, populist rbetoric would not thwart a deal with the IMF hecause it would have little tangible effect on the government's actual policy.

"These are election slogans and not real policies," said Mr Aleksashenko, whose opinion is widely shared by Russian businessmen, who have been acting on the assumption that Mr Yeltsin will not act on his campaign pledges.

Mr Aleksashenko said tbat, regardless of the president's new taste for populist slogans and the sacking of promineot reformers from the government, Moscow was very close to a deal with the IMF. There is some purely technical work and there are a few serious problems concerning prior actions which the Russian government must take." But be said Mr Camdessus was likely to seek a personal pledge from Mr Yeltsin that he would contique tough market reforms.

to their demands for back pay and subsidies for the industry, putting increased pressure on Kiev at a delicate time in the country's ecocomic reform effort. The miners' union said 63 of

227 state-owned mines continued to be shut down by the action and at another 110 pits miners refused to load coal. The strikes began on February

Declining coal reserves are already causing black-outs and heating sbortages in the Donbass region, where most mines are located. The government last week warned the stoppage could force power cuts and cripple industry by the end of the month

Although Kiev last week aliotted 6,000bn karbovanets (\$31.9m) and promised a further 15,000hn karbovanets within 20 days to cover wages unnaid for months, the government refuses to negotiate, citing the need to keep its finances tight ahead of an International Monetary Fund decision on a \$700m loan. Mr Yevhen Marchuk, the April.

prime minister, said subsidies would be a catastrophic for the entire economy", adding that any resolution would be based on "economic realities, not capriciousness".

Anatoly Lopata bad been relieved of his duties and transferred to other, unspecified daties. "There were differences in the views of the [defence] minister and the chief of staff on the future of the armed forces." a defence ministry spokesman. Mr Alexander Kinban, told a news conference. "The minister sees the armed forces being able to defend the country within its economic capability and does not favour building such an army that might extend to the sbores of the English Channel." The deputy defence minister, Mr Ivan Bizhan, a senior officer during the Soviet era, was named acting chief-of-staff.

Ukraine's defence minister, Mr Valery Shmarov, became the first civilian defence minister in a former Soviet republic outside the Baltic region when be was appointed in October 1994. But he has been criticised for huilding close links with Nato and for approving the dismantling of the country's nuclear arsenal. He plans cuts in the armed forces from 470,000 to 350,000.

By contrast, the Russian gov-Mr Marchuk last week ernment this month agreed to blamed the strikes on the govpay out back wages to stop ernment's limited success in strikes hy its miners. The Bank of Italy has raised

the alarm about the increasing

period 1987-93 to 342,000. In addition, some 140,000 traders and small businessmen were now resorting to strozzini (loan sharks).

The report is the most comprehensive attempt yet to assess the scale and impact of a phenomenon which has begun to worry bankers, the police and social workers. It believes that some 660,000 households are using or at risk from loan sharks.

On this hasis, the bank estimates the total amount of money being lent annually was L7,600bn (\$4.9bn) at the end of 1993. But on this outlay by the strozzini. the report considers the total profit is in the region of L3,500bn. Organised crime is

not only discovering that loan sharking is an extremely effective way of money laundering but that it is one of its most profitable areas. The profits are in fact far more substantial than those currently enjoyed

indicate a direct correlation between the resort to illicit non-bank credit and the onset of recession in the nineties. In 1987 there were only 79,000 bouseholds using loan sharks with total loans of L&21bn. But by 1991 there were 236.000 housebolds involving loans worth L2.027bn.

The size of the business is backed up by figures for the number of instances in which loan sharking has heen denounced. Between January-September last year 2,748 cases were reported to the authori-ties leading to the arrest of 690 people. By far the largest number of cases concerned Sicily (543), with 163 arrests, and overall almost 60 per cent of the loan sharking cases were in southern Italy.

The existence of loan sharking is explained in part by the difficulty of ohtaining short-term credit/overdraft facilities from banks and the banks' draconian powers when

calling in loans. Credit cannot he easily arranged at short notice. requires many hureaucratic procedures and involves the pledging of assets. This in itself puts off many potential clients. especially those already in financial difficulties,

Dutch sport channel faces probe The figures in the report

The European Commission said yesterday that plans for a Dutch cable and satellite TV sports channel involving the country's football federation might violate competition rules.

The competition commissioner, Mr Karel van Miert, said that the venture, announced at the weekend, would need to be investigated by his office before broadcasts could start as scheduled in the summer. Mr Van Miert said the project raised the question that some partners involved could obtain a dominant position in Dutch hroadcasting.

The new channel's partners are Endemol, the television production company, Philips Electronics, ING, the banking and insurance group, and several Dutch cable distributors. The Dutch football federation is also a partner and will receive Fl 1bn (£406m) over seven years for broadcasting rights to football league matches. The federation will receive a 10 per cent stake in the proposed channel. AP. Brussels

Belgium agrees jobs measures

Belgium's government, unions and employers yesterday agreed in principle on an outlina package of measures to boost economic growth with the aim of creating jobs.

After a first meeting led by Mr Jean-Loc Dehaene, prime minister, the three sides said in a joint statement they would do everything to preserve, create and redistribute employment

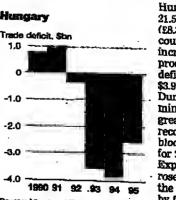

The joint statement called for a redistribution of available work, a general framework for pay policy, a general framework for cuts in wage costs which does not affect the social security system, a more lenient organisation of labour and the reduction of overtime and black market Reuter, Brussel

an 8 per cent import duty surcharge, brought in as part of last

Hungarian exports jumped by 21.5 per cent to \$12.9hn (£8.3hn) last year, beloing the country to a 2 per cent increase in gross domestic product and cutting its trade deficit to \$2.6bn, down from \$3.9hn in 1994, Mr Imre Dunai, the trade and industry minister said yesterday. The greatest increase was recorded with former eastern bloc states which accounted for 24 per cent of trade. Exports to these countries rose by 31 per cent. However, the European Union remains by far Hungary's most important trading partner, accounting for 63 per cent of exports and 61.5 per cent of

Georgians hope to win cyberspace race

By Peter Graff in Tbilisi

• be streets of Toilisi were in the usual winter darkness, a total hlackout, hnt a tiny light sbone through the window of a base-

ment affice in Republic Square. Inside, young polyglots burned the midnight oil in their electricity generator. carefully maintaining the high-tech on-ramp they hope will make the former Soviet republic of Georgia a long-term destination on the information superhighway.

Georgia has seen four civil wars, hyperinflation, a near total collapse of industry and an energy crisis that bas left it with no beat and rationed electricity - all since independence in 1991. It is a place where getting a teleponne can take years and placing a call can take hours. And according to Mr Georgy Kashia, a 24-year-old physicist, it is a country that is ripe to claim a place in the multimedia telecoms revolution.

Mr Kashia is the director of the company that runs Sanet, Georgia's

Internet gateway, and like the student hackers across the Atlantic who bave turned multimedia into multibillion-dollar business, be is finding his way as a young captain of a

younger industry. Georgia has some advantages over similar countries looking for a way on to the Infobahn. Tbilisi is home to a bighly educated urban population. Mnst Georgians are bllingual, in their native language and in Russian, and seem less Intimidated than other citizens of the former Soviet republics by the task of learning English. the common language of cyberspace

But the country's sheer poverty. and its outdated phone system made the barriers to entry formidable.

Mr Kashia got his start as a teenage whiz-kid when Mr Mikhail Gorbachev was nursing tha Soviet Union to its break-up. His company relayed electronic mail from Tbilisi over crackly Soviat long-distance phone lines to one of the early Moscow compoter network gateways. in a country where every typewriter and radio had

to be registered with the authorities, public access to sncb new communication technologies was only brought about hy the new openness.

Mr Kasbia's first customers were mostly traders liberated hy the reforms, who used e-mail to keep in toncb with suppliers and customers in other parts of a slowly disintegrating Soviet Union.

Mr Kasbia saw business grow just after Georgia gained independence, when owning a western-made personal computer became something of a status symbol

be country is still home to a surprisingly large number of slightly outdated PCs from a mini-boom in 1992. His e-mail business soon sagged a bit as the united Soviet economy fell apart.

Then Georgia's civil wars levelled much of Thilisi city centre. But they brongbt humanitarian aid organisations and other western agencies which supplied Mr Kashla with a new base of customers. Today his e-mail

subscribers are split roughly between expatriates and locals.

But it was not until 1995 that a US government programme transformed Sanet from a simple electronic mailbox to a provider of real-time access to the world's largest computer network, the Internet, and its popular multimedia side, the world-wide-web. The two-year programme, funded

by the US Agency for International Development (USAID), was part of an experiment to "promote the rule of law" by giving free Internet access to the Georgian parliament. The

Americans supplied computer equip-ment and paid for a rented satellite telephone line to link Sanet to an Internet provider in the US.

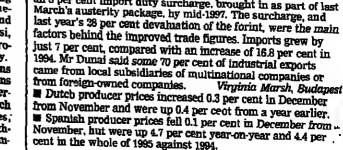

Sanet now provides a full time Internel service free to Georgia's parliament and to President Ednard Shevardnadze's office, and in return USAID lets Mr Kashia nse excess capacity on the rented line to sell Internet access at commercial rates, The aim, says USAID, is for Mr Kashia to earn enough revenue from

commercial clients so that, when the grant runs nnt, Sanet Itself can pay for the satellite link and keep the project going. Sanet now sells Internet access sub-

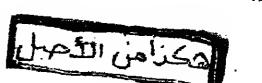

scriptions for about \$150 a month. The price is still overwhelming for most ordinary citizens, and subscribers so far have been limited mostly to foreign organisations that have the extra casb. But Mr Kashia says he is convinced that as Georgia recovers from its economic tailspin, local demand is bound to rise.

Sanet's server also hosts a growing nnmber of wnrld-wide-web hnmepages for Georgian institutions and foreign agencies operating in Tbilisi, such as the UN's World Food Programme and the American embassy. Mr Kashia is now working on plans

for computerised reservation systems for Georgia's guest houses and international airlines. Cyberspace, which spurns geographical houndaries; allows Sanet to compete with hightech companies in higher wage countries.

French-language radio law seen as a challenge

Brussels fails to call

Last month a French law came into force under which 40 per cent of songs broadcast on the radio have to be in French. French radio stations - particularly "theme" stations that play one type of music - say 40 per cent is totally disproportionate and virtually impossible to fulfil. "The Commission could at least ask for the quotas to be lowered," said a

spokeswoman for the French radio broadcasters' body. The French government said it did not intend to block the free movement of services with

the quota regime. A letter sent to the Commission indicated it was simply fed up with radio stations playing 250 "Anglo-Saxon" songs out of a total of 300 and wanted to correct the imbalance.

THE FINANCIAL TIMES Published by The Financial Turns (Europei GmbH, Nibelungenplatz 3, 60318 Frank-furt am Mam. Germany Telephone ++39 69 156 820, Fay ++49 69 396 4481, Repre-sented in Frankfart by J Walter Brand, Wilhelm J. Brüssel, Colin A. Kennard az elesthälfsführer and la London by David (C.M. Santer seeks to rebuild confidence

Lionel Barber on the Commission chief's call for a

pact between employers, unions and governments

Many have begun to realise that Santer has taken his first big risk since becoming president of the European Commission a year ago

Santer aides want to break the connection which Emu France, Germany and other opponents are making between Maastricht-induced budget auscountries where progress toward eliminating rigidities in terity and unemployment in the labour market has been slow, particularly in the public Europe, where more than 20m sector, in spite of similar tri-partite "confidence pacts". people are out of work. That means fine-tuning the monoto-Mr Zygmund Tyskiewicz. nous insistence oo meeting the Maastricht criteria and focussecretary general of Unice, the ing on job measures. European employers' federa-Mr Santer intends to flesh tion, says that Mr Santer can do little more than 'point the out his proposals shortly on a tour of the 15 EU capitals. way" because the powers to intervene lie with member There are three main elemeots.

First, Mr Santer wants to states. But he applauds the Commission initiative, proreinvigorate Europe's drive to vided it does not try to dragoon reduce non-wage costs to encourage employers to hire husiness into unrealistic promlabour and to maintain support ises to "stop destroying jobs". Mr Wim Bergans, spokesman for the ETUC in Brussels, is for fiscal consolidation. He plans to hold a summit also supportive, but cautions: between the "social parmers' in May before the next EU "We don't want to reopen negotiations on Emu, but you summit in Florence in June. Critics argue that Mr Sanwill not have Emu with 20m ter's real aim is to stiffen the people out of work in Europe."

EU business and consumer sentiment

Batances (%) Business Asan Consume 1989 90 91 92 95 political consensus in Belgium, Second, the Commission has

discovered substantial underspending in EU farm spending as a result of the fall in production caused by reforms in the common agricultural policy. Mr Santer wants to reallocate the savings, shelling out an extra Eculbn (£850m) between 1996 and 1999 oo road, rail and telecommunications projects known as trans-European networks (TENS), as well as Ecu700m more on research. The funds are a tiny portion of the EcuS6bn annual EU bud-get. The Commission believes failure to follow up the commitment to TENS projects such as the high-speed rail lines linking Europe's major capitals has hurt EU credibility. Critics argue that the money is a drop in the Brussels hucket, and most governments are likely to seek reimhursement to their

national treasuries. Third, Mr Santer announced in his speech that he wants to pot employment on the agenda of the intergovernmental con-ference which opens at the end of next month. Depending on exactly what he means, this could spell trooble.

Everyone agrees that Emu should be kept out of the IGC. and that there should be no attempt to rewrite the Maastricht criteria. However some countries believe that Maastricht's "monetary pillar" should he balanced by an 'employmeot pillar",

Swedeo is pressing for legally binding measures to promote employment and growth to be included in "Maastricht 2", but other countries - notably Britain - seem certain to resist moves to insti-tutionalise the fight against unemployment

Though Santer aides are wary of sbowing their hand, tbey express clear desire to move beyond exchange of information and loose co-operation to more formal "co-ordinatioo" of labour market policy. As such, the Santer "confidence pact" is more than mere rhetoric; it is a foretaste of the wider argument about the division between national and EUwide powers and responsibilities which will dominate dehate in the IGC and the run-up to Emu.

Holbrooke defuses Bosnian crisis over war criminals

By Harriet Martin in Sarajevo

Mr Richard Holbrooke, the US assistant secretary of state, defused a crisis in the Bosnian peace process yesterday by establishing that any arrests of suspected war criminals must be sanctioned by the UN tribnnal in The Hague,

After shuttling between Belgrade and Sarajevo, Mr Holbrooke also won a promise from the Bosnian government that it would free any

detainees whose arrest the tribunal refuses to endorse. A crisis flared following the arrests.

detention by the Bosnian government of eight Serb soldiers. Four of these have been released, but the Bosnian authorities are still holding two senior Serb officers. General Ratko Mladic, the Bosnian Serb army commander, wbo

has been indicted for war crimes himself, ordered bis troops last week to break off contacts with

Nato peace forces in protest over the In broking a deal over war crimi-

nals, Mr Holbrooke had to tread carefully between rival representatives of his own country as well as between Serbs and Bosnians. While the US administration has

presented the punishment of atrocities as a key part of its Bosnia policy, Admiral Leighton Smith and other commanders of Nato's 60,000strong implementation force (lfor)

remain cantions about intensifying their own contribution to the prosecution of war crimes,

The Dayton peace agreement makes it clear that Nato will not actively seek ont war criminals, hut it will arrest any that it "comes across" in the course of its other duties. However, Col Mark Rayner, an Ifor spokesman, acknowledged yesterday that the Nato mission did not have enough information abont the suspects to be sure of identify-

ing them. Only one of the 52 people indicted by the war crimes tribunal has been arrested so far.

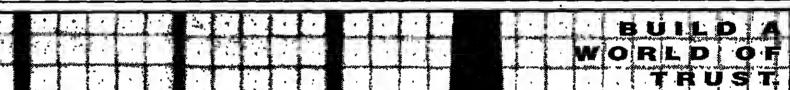

Another Ifor official said that in order to assuage Bosnian anger over the failure to make more arrests, a greater effort would be made to distribute information about the wanted men to Nato soldiers.

"There is a bigger commitment than before to getting that information to the [Nato] checkpoints," he said. In Mostar, the Nato secretary

general, Mr Javier Solana, warned that the alliance would not tolerate further attacks on officials like the one inflicted by the Croats on the European Union's Mr Hans Koschnick in his car last week.

"The way they have been treating Mr Koschnick is something we are not going to tolerate and we made that very clear to everybody," he told a news conference.

Editorial comment, Page 15

By Laura Tyson in Taipei

Taiwan has moved to calm rising tensions with China and boost Its financial markets before the country's presidential elections in late March.

The cabinet yesterdey announced a package of measures designed to improve waning voter sentiment toward the ruling Nationalist party, which although still comfortably leading opinion polls has seen an early wide margin of support eroded in recent months

A task force drawn from government departments has been formed to monitor relations across the Taiwan strait, tighten security before the elections and take steps to bol-

ster the sluggisb economy. The moves were intended to "stabilise the political and economic situation and strengthen peopla's confidence so that the historic presidential election can be smoothly completed", a cabinet statement said. Political analysts saw the announcement as a positive move toward repairing fraught ties with China, which is preparing to hold a large-scale military exercise near the Taiwan strait.

Stock analysts, however, disappointed that the package did not included a hoped for cut in banks' required reserve ratio or a cut in the central bank's rediscount rate, said the measures would not have a substantial impact.

By Edward Luce in Manila The Swiss government has

threatened to ignore an American court if it goes ahead with efforts to reclaim \$475m in Zurich allegedly stolen from the Philippine people by the late dictator, President Ferdinand Marcos. The Los Angeles court.

which ruled last year the money should be transferred to 10.000 Filipino buman rights victims, said at the weekend Switzerland had threatened "compulsory measures" if the ruling against Swiss Bank Corporatioo and Crédit Suisse were allowed to stand. The two banks, which failed in talks last month to resolve their differences with the buman rights victims and the Philippine government on what to do with the cash, were last year ordered by a Zurich

court to transfer the money to a escrow account in Manila. The money would remain fro-zen until Philippine courts issued a final ruling on its ownership. The two banks are appealing against the Zurich ruling. The Los Angeles appeals court, which upbeld a roling in

Hawaii last year ordering that \$1.9hn be directly transferred from the estimated \$10bn Marcos estate to the human rights victims as compensation, has threatened to take action against the Swiss banks unless the money is turned over to the victims. In a letter sent to the US

court and released by Judge Manuel Real in Los Angeles at the weekend, Swiss officials blankly refused to comply with the American ruling. "Any effort hy United States courts to enforce the order through the imposition of sanctions on the banks would conflict with Swiss sovereignty, interna-tional law and Swiss criminal law," the letter said.

The Swiss government's action is the latest twist in a decade-long tussle over the Marcos estate since the dictator was overthrown in 1986.

Mrs Imelda Marcos, his widow, who is appealing against a 24-year Philippine prison sentence for graft, last year offered to return a portion of the estate to the Philippine government is exchange for immunity from prosecution.

The Philippine government, which also disputes the Los Angeles court's right to award the \$475m held in Zurich, has heen requested by the Swiss government to produce a watertight conviction of Mrs Marcos before the money is

returned to Manila. The Philippina government has told buman rights victims to pursue compensation through the Philippine judicial system rather than courts in the US. South Korea plans to bold exercises next month near the island that is at the centre of a territorial dispute with Japan, the defence ministry in Seoul said yesterday. The Korean exercise close to the disputed island in the Sea of Japan known as Tok-do in Korean and Takeshima in Japanese - will involve naval destroyers and fast patrol boats. supported hy anti-submarine aircraft and jet fighters.

Although officials emphasised the exercise was a routine one that occurs every three months, it is likely to exacerbate tensions with Japan. The Korean-Japanese diplomatic row flared last week when Tokyo renewed claims to the island. which has been occupied by a South Korean police garrison for the last 40 years. Japanese interest in the island is linked to its plans to extend its exclusive economic zone in the Sea of Japan under tha United Nations convention on the law of the sea Jack Burton, Seoul

Major to visit Hong Kong

Mr John Major, the British prime minister, will visit Hong Kong on March 3 and 4, his office confirmed yesterday. Mr Major is to fly to the British colony, which is due to be handed back to China in July 1997, following a summit in Bangkok of Asian and European Union leaders. On his way bome from Hong Kong, Mr Major is to stop in

Seoul for talks with Mr Kim Young-sam, the South Korean president. A presidential spokesman in Seoul said yesterday the two leaders would discuss economic and trade co-operation. The visit to Korea will be the first by a UK prime minister since Mrs Margaret Thatcher in 1986. Reuter. Hong I Reuter, Hong Kong

Germans offer China cheap loan

Germany has lent China DM780m (\$530m) at very preferential interest rates in an effort to win the second contract for the Shanghai underground, where Siemens and AEG are up against a consortium led by the Canadian group Bombardier Against a consortium teo by the Canadian group Bombartier. Mr Zhu Rongji, Chinese deputy prime minister, yesterday ended a six-day visit to Germany. The German companies built the first Shanghai underground line. The federal hudget will provide DM450m while the state-owned bank Kreditanstalt für Wiederaufbau will provide the balance. The funds from the federal budget are being offered for 40 years at a favourable annual interest rate of 0.75 per cent with repayment only beginning after 15 years. Michael Lindemann, Bonn

Boycott and bombs hurt Sri Lanka

By Amal Jayasinghe In Colombo

Sri Lanka is facing a poor winter tourist season, following the discovery of a truck bomh in the capital Colombo barely 24 hours before a World Cup-related cricket match.

Police yesterday found a truck packed with 121kg of explosives parked at a Buddhist temple in the city's com-mercial district. The find was a short distance away from the venue of today's "solidarity" match with a team of India and Pakistan's hest players, planned as a gesture of support after Sri Lanka was snubbed

Indian teams, which pulled out of World Cup matches here citing security concerns. Senior officials and tour operators "The Australians' rejection said the Central Bank bombing will have adverse effects not coupled with the boycott was a only on sports, but on other serious setback to tourism and activities such as tourism and

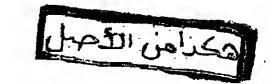

the latest truck bomh could foreign investment too." Mr S B Dissanayake, sports minisnot have come at a worse time. "The Australians may now ter, said. Financial analysts seem justified in keeping said planned foreign investaway," a tour operator said. "When foreign teams pull out ment projects might be put on hold, although short-term portbecause of fears of bomb folio investments were attacks, it sends a very negaunlikely to suffer because of tive signal to tourists planning bargain basement prices at the Colombo Stock Exchange. The bolidays here." The Colombo government said the boycott of Sri Lanka was "just not the World Cup series, George cricket". It promised foreign by the Australia and West teams security usually Steuarts, said it had been hanking on the matches to

reserved for visiting heads of state, an offer spurned by Aus-tralia and the West Indies. drum up business but now the

situation looked bleak Australia's Foreign Ministry advised travellers shortly after the Central Bank bombing: "The possibility of attacks

against airports, hotels and tourist facilities cannot be ruled out." The bomb killed 87 people and hurt 1,400. The country's biggest tour operator and botel owner, John

Keells Holdings, noted the island was going through a bad winter already and the escala-tion of violence could only make matters worse for the official tour operator here for industry. "We can only expect a worse winter now in 1996," said Mr Ajit Gunawardena, a John Keells director.

Behind the telephone that rests so comfortably in your hand is a vast system of lines, links and connections. It is the communications infrastructure, and without it that phone call would be impossible. NTT, Japan's largest telecommunications carrier, is the company behind the telephone. Working with local telecommunications companies around the world, NTT can create a one-stop, total communications service, from planning to infrastructure --- then go on to provide such additional support as maintenance, technical assistance, training, and education. NTT's optical fiber and cable business is at the forefront of multimedia development, so systems keep getting more powerful,

more convenient, and more essential. And with a focus on R&D — with over 3000 patent applications each year - NTT will be creating telecommunications systems for generations to come. Building a better world. Together with NTT.

NEWS: THE AMERICAS

Iowa caucus proves a Tucumán's Monopoly money wages Tucumán's money problems perfect family affair of Hamilton Bank, "Otherwise do not end here. The province's By David Pilling in San Miguel de Tucumán, Argentina

By Pattl Waldmein in Des Moines, Iowa

There were two political battles going on in Iowa. One was the race for the presidency, fought out last night in caucus voting for the Republican nomination. But the other race, the struggle for the position of Republican first family, was fought by the spouses and long-suffering children of those who would be president. For the post of shadow first

lady, it was no contest. Mrs Elizabeth "Liddy" Dole, wife of front-runner Senator Bob Dole, came closest to looking and acting the part. A former secretary of transportation (under Ronald Reagan) and president of the American Red Cross (now on leave), she is articulate and first lady-like ~ and such a good politician that she campaigned separately from her husband, throughout the

But the race for first family was won easily by the Family Forbes by sheer force of numbers. For the first time Mr Steve Forbes, multi-millionaire publisher, appeared on the stump flanked by his own version of the American dream: four all-American teenage daughters and his fifth, a blond

eight-year old clutching a flaxen-haired doll.

Whatever the political future holds for Mr Forbes, his family is clearly an asset in a cam-paign dominated by the rheto-ric of family values. The four elder girls beamed with a pride unusual among teenagers, when interviewed about their father's presidential campaign on CNN'a Larry King Live pro-gramme. The eight-year-old, Elizabeth, stole the show with

charm. The caricature of Mr Forbes painted by his opponents - as an East Coast snob comfortable only amongst yachts and polo ponies - was dispelled by tha imagery of his family. They all looked as though they could have been raised on a farm in Iowa - apart from Mr Forbes White House travel office. himself.

However, Mr Forbes was not the only one wielding the secret weapon of American politics, the family. Senator Phil Gramm of Texas brought his two grown sons and his Korean-American wife, Wendy along to a Saturday night rally against gay marriage. Wendy, a former bead of the Commodities Futures Trading Commis-sion, is a familiar figure on the campaign trail. Some say she is a major driving force.

province in north-western But the two boys also played Argentina, is often more like their part, applauding enthusiastically when their father extolled the virtues of "traditional marriage," defined, to avoid misunderstanding, as "one man, one woman." Mr Pat Buchanan, the ultraconservative commentator, had only his wife to show off at

the rally, but he used her to good effect. He nominated the glamorous Shelley to the post of first lady, a proposal which drew wide applause from the conservative audience, and then joked about her plans for the White House travel office whatsoever. a pointed reminder of the political damage that presidents sometimes suffer from their wives. Mrs Hillary Clinton is widely believed to hava insisted on the sacking of the

Mr Alan Keyes, the black conservative who campaigns strongly on a pro-family platform, brought all his children along to the party. The three youngsters, two boys and a girl, stood awkwardly as he flailed his arms and fulminated to the European Commission. The agenda is there, it's on the table," said Mr Manuel Marin, vice presagainst homosexuals from the pulpit of the First Federated Church of Des Moines.

The race for the family quarident of the Commission, before leaving ters of the White House has Havana on Sunday after three days of only just begun. talks with Cuban government officials,

playing Monopoly than real life. Unwitting visitors soon find their pockets bulging with provincial bonds - known as Tucumani dollars - which are readily accepted within Tucuman, but worthless elsewhere. The exact status of Tucumani dollars, and similar notes

Shopping in Tucumán, a sleepy

from the province's inability to pay its bloated civil service, which absorbs four-fifths of expenditure. Administrations have crammed wage packets with bonds, denominated in handy one and five "peso" bills. Tucumanis, who mostly mist. accept bonds at face value, nevertheless tend to spend them first, keeping their pesos in reserve. The bonds, like a virus, are slowly taking over.

Officially there are \$53m in bonds, about a third of Tucuman's paper money, in circulation. "But the statistics are so terrible here, that nobody really has any idea," says Mr Osvaldo Meloni, a local econo-

> "The authorities must measure very carefully how much they emit as a proportion of pesos in circulation," says Mr Adolfo Martínez, vice-president

they risk creating a hig dis-count markat and causing hyperinflation."

That is what happened in Jujuy, a neighbouring province, where bonds are now worthless. But in Tucumán people have maintained a grudging faith in their currency.

Ms Angelica Hernandez, a shopkeeper, says: "Wa don't really want to take them, because we can't use them to buy merchandise from other provinces. But lots of people want to pay in bonds. It's a problem.

Mr Martinez says the bonds, printed on poor-quality paper, are e crafty invention. "When they disintegrate through wear and tear, the debt simply van-

post-dated cheques. Some \$75m in such cheques already circulate as "money". although shopkeepers discount them by 10-30 per cent. That adds up to very high inflation in a country which, at national level, boasted 1995 annual inflation of only 1.6 per cent.

Mr Domingo Cavallo, Argentina's economy minister, is now pushing several provinces to clean up their financial mess. But, says Mr Martínez, "if Cavallo really wants to straighten out provincial financial systems, he will eventually have to make all this funny money disappear for good."

Political reform on agenda of EU, Cuba talks

He also had a 10-hour meeting with

Cuban President Fidel Castro. Cuba is the only nation in Latin America which does not have a formal agreement with the EU. However, Cuba has insisted it will not accept pre-conditions for such an accord.

Mr Marin confirmed that the broad agenda for negotiations included an expanded role for free enterprise in Cuba's state-run economy and reforms

Catholic Church leaders and political to the island's penal system, which fre-dissidents. quently jails critics and opponents of one-party communist rule.

The inclusion of such proposals reflects the European view that Cuba should move towards a more demo-cratic system and open economy. Nevertheless, Mr Marin said Cuba's

problems could not be solved from Europe. "Solutions must come from inside Cuba," he said. The European Union has also urged the US to lift its longstanding embargo against Cuba.

Mr Marin said the EU and Cuba needed to establish the "Imits, content and pace" of the future negotiations on an accord.

A Cuban government delegation would present a detailed position in Brussels in a month so that the Commission could draw up a formal mandate for the talks.

This is expected to take place in the first half of this year, while the negotiating process itself would take longer, maybe two to three years.

58 leftwing leaders in the south-eastern state of Tabasco, whera thousands of Maya Indian peasants, led by the opposition Revolutionary Democratic party (PRD), are blockading oil wells belonging to Petróleos Mexicanos, the state oil monopoly.

The government crackdown in Tabasco comes after two tense weeks in which the army and riot police have failed to dislodge protestors from 64 Pemer installations in the state.

The oil blockade is the most serious political rebellion in Mexico since President Ernesto Zedillo took office 14 months ego, and may derail the gov ernment's efforts to reach a national agreement between political parties on electoral reform. The PRD claims to be mobilising supporters against the environmental damage caused by oil spills and the leakage of toxic waste into Tabasco's swampy terrain. The government, however, has accused the leftist party of manipulating environmental grievances to revive its campaign to unseat the governor of Tabasco, Mr Roberto Madrazo, who belongs to the ruling Institutional Revolutionary party (PRD. The PRD has contested Mr Madrazo's victory since his election in November 1994. alleging widespread fraud. Last June, Mr Andrés Manuel López Obrador, the defeated PRD candidate, presented 16 boxes of bank ledgers, cheque stube, invoices and receipts which purported to show Mr Madrazo had spent \$70m in his election campaign ~ 60 times the legal limit. Mr Madrazo has so far succeeded in blocking an investigation into the source of his campaign funds with several dilatory appeals to the supreme court. He denies the PRD accusations and has refused to relinquish his governorship. Mr Madrazo commands a strong following in Tabasco. He also enjoys the tacit support of regional PRI party barons, who resent central government interference in their personal fiefdoms and would be equally vulnerabla to any probe into their financial affairs.

property and criminal association", offences that carry stiff jail penalties.

The impasse in Tabasco is a prime example of tha simmering post-electoral conflicts Mr Zedillo would like to bury with new legislation to create an independent electoral authority and require the timely disclosure of the source and use of party political funds. Until the government

ordered the arrest of Tabasco's PRD leaders, such an agreement appeared to be within reach. The national PRD leadership, however, may now feel obliged to walk out of the electoral reform negotiations in e show of support for its Tabasco militants.

The government is seeking to prosecute the organisers of the oil blockade for "alleged sabotage, damage to public

On Sunday Pemer accurd the protesters of sabotage. The company said it had discovered that valves had been closed at one of its oil wells, causing a dangerous build-up of gas pres-SUITE.

Mr López Obrador says he is ready to go to jail. In an interview at his home in Villahermosa, the capital of Tabasco. he blamed part of Mexico's economic crisis on the PRI's unfettered expenditure during the 1994 general elections. "This is a civil resistance movement against an illegitimate government," he said. "If we do not keep our protest alive, our demands will be forgotten and electoral crimes will go unpunished."

The PRD leader said Pemer maintenance crews would be allowed access to oil wells this week, so that his followers could no longer be accused of sabotage.

In Mexico City, Mr Adrian Lajous, director general of the state oil monopoly, complained that Pemex was being "held hostage to a political squab-ble". Although the blockades have affected less than 1 per cent of Pemez's total oil production, most of it pumped fi-shore. Mr Lajons stressed the risk of anvironmental acci-dents if protestors continued to deny maintenance crewe access to installations. He estimated the blockade was costing Pemex \$687,000 a day.

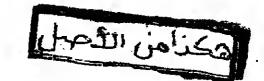

At the Sen oil field, a few kilometres north of Villahermosa, the roads have been cut off with felled banana trees, rusted drain pipes and mounds of rubble. The army came twice last week to dislodge the protesters, who disappeared into the surrounding swamps only to return once the soldiers had gone.

Senator Auldárico Hernández Gerónimo, a Chontal Maya like most of the peasants guarding the entrance to the oil field, says they will continue to man the barricades until Pemex agrees to share its riches with the original inhabitants of Tabasco.

"We are an oil state, but we have no jobs, our children die of cholera, and our fields are barren," the senator says. "The government can put us all in prison, but what will it do then?

US /--

Scientists have taken steps towards solving one of the great mysteries of the brain: how it keeps track of time. Humans have two separate biological clocks inside their heads and fundamental discoveries about both were announced yesterday at the American Association for the Advancement of Science meeting in Baltimore.

One is the "circadian clock" which ensures that the body's internal rhythms, such as sleeping and waking, are synchronised with the outside world.

The other is the "interval clock",

Hopes for ozone layer recovery Ozone destruction hy man-made chemicals in tha upper atmosphere is unlikely to become much worse over the next few years, and the Baltimore yesterday. However, they warned there atmospheric researcher with was still a small risk that a the US space agency Nasa, said protective ozone layer should begin to recover early in the was still a small risk that a

ment of Science meeting in sun.

gives us a sense of how much time has passed since a particular event or how long something is likely to take. It is used, for example, to judge whether we can cross a road safely before an oncoming car reaches us. Dr Warren Meck, an experimental psychologist at Duke University in

North Carolina, and Professor John Gibbon of the New York State Psychiatric Institute told the AAAS that they had discovered the neural cir-cultry underlying the interval clock. A combination of animal experi-

ments and human brain imaging studies shows that the interval clock

like an internal stopwatch, which lies within a region of the brain called eventually to improved treatments. the basal ganglia.

Its first component, the substantia migra, functions as a metronome or pacemaker, sending a steady stream of galses to the striatum. This is a gatekeeper which turns on and off awareness of time intervals and feeds that information to the frontal cortex where the information is stored in

The discovery has implications for sufferers of brain disorders such as Parkinson's disease, in which tha basal ganglia are damaged. It explains why such patients often have a defective sense of timing, and it could lead

According to Dr Meck, there are

also more profound implications. "We believe timing is the foundation for learning and memory," he said. Defec-tive timing mechanisms may underlie some learning disabilities and may

contribute to dyslexia. Professor Rae Silver, a psychologist at Columbia University in New York, told the AAAS that her research team had discovered how the circadian clock - a small group of cells behind tha eyes called the suprachiasmic nucleus - communicates with the rest of the brain.

Animal experiments show, supris-

ingly, that the link is through biochemical signals rather than nerve connections. When it is time to sleep, the suprachiasmic nucleus emits a chemical that tells the pineal gland in the brain to release the soporific hormone, melatonin, into the bloodstream

Prof Silver and her colleague. Dr Patrick Tresco at the University of Utah, expect soon to identify the chemical responsible.

Then it could be developed as a drug to reset the body clock more efficiently than the melatonin pills that have recently become a popular treatment for jet lag.

> tor would be a gigantic volcanic eruption, even bigger than Mount Pinatubo in 1991, which would inject enough "aerosol" particles into the stratosphere to accelerate ozone destruction.

Prof Sherwood Rowland of the University of California at Irvine said: "The most likely outcome is that things will not get very much worse than they are now."

INTERNATIONAL NEWS DIGEST

Donors near deal on loans fund

Donor countries yesterday hammered out many of the details of an emergency SDR3bn (22.9bn) fund to allow the World Bank to keep up its programme of soft loans to very poor countries. Finance ministry officials will meet in Tokyo next month to finalise the fund, which will enable the World Bank'a International Development Association to continue to lend over the next year.

Agreement was reached yesterday on many of tha fund's characteristics, including a ban on using loans from the fund for procurement from countries which have not contributed to it. This mainly affects the US and Italy, which have not yet paid in full the money they promised the IDA for 1993-96.

Ms Jan Piercy, the US executive director at the World Bank, said the US did not regard the procurement ban as helpful, or in the best interests of the very poor countries which borrow from the IDA. Nevertheless, it was less damaging in the context of the special fund than it would have been if implemented across the board for IDA loans.

The World Bank, which had asked member countries for SDR9hn to cover IDA for the 1997-99 period, hopes the Tokyo meeting will also come up with a longer-term funding formula for the IDA for 1998 and 1999. But finding the money for this period will still be difficult. US officials have already said the \$1.94bn projected by the World Bank as the US contribution is unrealistic. George Graham, Banking Correspondent

Peres to dissolve parliament

Mr Shimon Peres, Israel's prime minister, yesterday called for the dissolution of parliament to allow for elections by the end of May. The government presented four bills to enable the dissolution of the 120-member Knesset.

Mr Peres was yesterday due to meet Mr Benjamin Netanyahu the right-wing Likud leader and his main rival, to fix a final date. Although Mr Peres is said to prefer a poll on May 28, he yesterday raised the prospect of a May 21 election in an attempt to put pressure on the opposition not to filibuster the dissolution bills.

Up to 3.9m Israelis will cast two ballots at the next election. one for the direct election of the prime minister and a second for parliamentary deputies. Recent polls have shown Mr Peres, who is riding a wave of public sympathy following the assassination of former prime minister Yitzhak Rabin, leading Mr Netanyahu by up to 22 points. A Gallup poll published last Friday showed that 52 per cent of Israelis would vote for Mr Peres and 30 per cent for Mr Netanyahu. Another poll on the same day showed Mr Peres at 51 per cent against Mr Netanyahu's 36 per cent. Julian Ozanne, Jerusale Julian Ozanne, Jerusalen

Iraq, Syria consider dam action

Iraq and Syria are considering taking action against European companies helping Turkey to build dams on the Euphrates River, a senior Iraqi official said yesterday.

"Among these measures is to deprive the French, British, Italian, Austrian, and Belgian companies which implement these dams of any projects that could become available in Syria or Iraq," said Mr Abdul-Sattar Salman, undersecretary at Baghdad's Irrigation Ministry. Syria and Iraq, ruled by rival wings of the Baath party, have been feuding for years but have set aside their political differences because they fear Turkey plans to reduce the flows of the Euphrates and Tigris rivers hy diverting their waters for hydroelectric and irrigation projects. Both rivers originate in Turkey, but are vital sources of water for Syria and Iraq. Mr Salman said Iraq and Syria needed to take action against Turkey if it pressed ahead with the Birecik and Carchemish dams AP, Domascus

Government aid 'at lowest level for 20 years'

By Gillian Tett in Paris

The world's richest governments have cut their aid to developing regions to the lowest level as a proportion of gross national product for 20 years.

However, these falls have been offset partly by higher levels of private investment from industrialised countries, according to tha latest aid report from the Organisation for Economic Co-operation and Development. Consequently the overall

level of resources moving from the industrialised world to the developing one is now at record levels. These mixed trends highlight

the complexities that now dog the aid debate in international 17 - 14 - 14 - 17 in the state of th organisations such as the Sound States and State OECD, a Paris-based think tank for 26 of the world's richest nations which conducts extensive research into devel-

> opment issues. For although some of the

like Africa are suffering from a reduction in resources, a small group of "developing" countries in south-east Asia and Latin America are attracting growing levels of investment. These distinctions have per-

suaded the OECD ltself to reform the way it classifies "developing" countries. Meanwhile, Mr James Michel, chairman of the OECD's development co-operation committee, yesterday warned that the growth of emerging markets meant "development finance is now at a crossroads".

"New approaches on development finance are now needed to allow for more differentiation between countries - and integration between external financing issues and domestic financial development," he

said. Measured overall, direct aid by OECD countries to the developed world was \$59bn (£38.3bn) in 1994.

poorest countries in regions This was roughly the same level, in real terms, as the previous year. However, it represented only 0.3 per cent of the GNP of the OECD's members the lowest level since 1973.

This reduction partly reflected a further fall in US spending. In dollar terms the US was the second largest donor in the world, but it gave only 0.15 per cent as a propor-tion of its GNP - the lowest level of any OECD member, and well below the United Nations target guidelines of 0.7 per cent. This reduction almost certainly continued in 1995, amid

continuing efforts by the government to cut its hudget defi-Other countries facing hadget deficits also cut their aid,

with falls of over 10 per cent in donations from Belgium, Italy and Finland, and a smaller reduction in Germany. Outside the OECD, Saudi Arabia, which faces its own

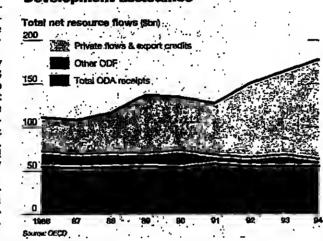

largest non-OECD donor. Japan, by contrast, which is the world's largest donor and accounts for 22 per cent of all OECD aid, actually increased budget problems, followed suit

Development assistance

It donated \$3.7bn in 1990, but its contribution (flattered only \$317m in 1994, and Kuwait partly by yen strength). France also increased its spending, which made it the has now overtaken it as the only G7 country whose aid budget exceeded 0.5 per cent. The geographical targets of this aid have remained broadly

similar in recent years, with Asia and sub-Saharan Africa. each receiving slightly over \$20bn in 1994, and Latin America receiving about half this. However, the overall level of resources received by each region differs sharply. In Asia official aid represented only a quarter of all resources, because of a sharp rise in private investment by OECD countries.

Central and South America have also seen steady increases in private investments, which were four times larger than aid

donations in 1994. However, the level of private investment received by sub-Saharan Africa was only a fifth of the size of the aid poured into the continent. Meanwhile, Africa only attracted \$2bn of the \$45bn worth of new foreign direct investment in developmg countries.

A growing proportion of total western assistance in 1994 was earmarked for debt forgive-

30

20

By Guy de Jonquières

The US has signalled that it would prefer to settle for an agreement in the World Trade Organisation which would partially liberalise basic telecommunications, rather than see negotiations drag on beyond their end-April deadline.

The US suggestion has surprised other leading WTO members. Many favour making an all-out effort to achieve a substantial and comprehensive accord, even if that means prolonging the negotiations.

They say the talks have made more progress than origi-nally expected and are moving with the tide of events in the industry. as governments worldwida embrace privatisation and freer competition with increasing enthusiasm.

However, the US donbts whether enough countries are

yet ready to translate these reforms into formal commitments in the WTO. It argues that unless more governments tries. do so soon, it would be better to conclude a limited deal and Many members, return to negotiations later this decade.

tary general of Unctad, arrived in Sonth Africa yesterday for talks a recent study showed that the 12 per cent of the South African popu-

US industry leader, may be losing interest in the WTO talks and pressing less hard for an ambitious agreement.

The US says it is satisfied by the European Union's offer in the negotiations, but is still looking for improved concessions from other WTO members including Canada, Japan and South Korea, and most south-east Asian and Letin American countries. The next round of negotia-

tions is due to be held in Geneva at the end of this month The talks will also focus on a US proposal, backed by several other WTO members, for a reg-ulatory framework which would ensure fair competition by setting global rules for telecoms markets.

Brussels acts to prise open foreign markets plant

By Caroline Southey in Brussels

The EU Commission will tomorrow announce e fresh drive to prise open foreign markets as part of a wide-ranging initiative aimed at creating a more coherent EU approach

in a strategy paper drawn up by five commissioners, including Sir Leon Brittan, the EU trade commissioner. The paper sets out steps the EU can take

Sir Leon Brittan; helped to draw up strategy paper abandon its defensiveness and focus fully on opening those markets that remain closed to our products and investments," an EU official said. The paper lays down the Commission's broad approach to trade policy and is designed to promote a debate about what the EU should table at the World Trade Organisation's first ministerial meeting

The paper says the EU has a "clear interest" in pursuing trade objectives through the multilateral trading system and applying WTO rules. But, it adds, e bilateral approach may in certain cases ochieve quicker results".

The paper emphasises that the EU will respect its "inter-national obligations", adding that the drive to open markets will be different from "market access initiatives taken by other major trading partners" because it will exclude "unilateral measures"

The commissioners list sectors where further efforts are needed to remove barriers, such as financial services, telecoms, maritime transport, rules of origin, rules for services, customs duties and gov-As part of a market access geographical responsibilities.

Trafalgar_t to build Thai steel

N

 $A(x)_{j \in \gamma}$

By Ted Bardacke in Bangkok

Thailand's rapidly developing eastern seaboard has received 6. boost from a contract with Trafalgar House of the UK to engineer, supply and build Thailand's first integrated iron and steelworks.

The value of the contract. which is expected to be signed during the visit to Bangkok by the UK prime minister, Mr John Major, next month, is

between \$650m and \$750m. The deal, one of the largest ever between Thai and British companies, calls for Trafalgar's engineering unit Davy International to construct a plant to produce 2.75m tonnes of hot liquid iron, 1.1m tonnes of coke and 2.15m tonnes of billets a vear.

Total cost of the project is approximately \$1bn and operations are expected to begin in early 1998.

The deal is Trafalgar's second hig contract in Thailand in less than a year. Last August the company, 26 per cent owned by Hong Kong Land, announced that its Groupe Sofresid subsidiary had won a \$420m contract from Thai Copper industries to supply and build the country's first copper smelting and refining plant. f.

The contracts will he executed on a turnkey basis, with Trafalgar declining to take an

equity stake in either plant. The UK company will he expected to provide an unspeci-fied amount of low-cost export financing for the steel plant. The rest of the plant's cost will be financed by a consortium led by two Thai banks, Bangkok Bank and Thai Military

Bank. European companies have lately come under criticism from Asian countries for selling to the rapidly expanding Asian markets without making significant investments in the region. Trafalgar is looking at taking a minority stake in some consortia participating in Thailand's S4bn independent power scheme to produce elec. tricity as part of a potential deal to supply equipment to those plants, a company executive said.

Thai Special Steel Industry, which awarded the contract, is a subsidiary of Thal Petrochemical Industry and its affili-

ate, Siam Steel Pipes. Part of the plant's ontput will be sold to TSSI's whre rod mill and other competitors which produce steel products but which rely on Importe. slab and billet. One of TSSI's main competitors, Sahaviriya Steel Industries, is contemplating a similar integrated project at Its Bang Saphan complex, which is also along the eastern seaboard.

Direct foreign investment in Japan

Japanese companies investment abroad is accelerating and changing focus from mature economies to emerging markets in Asia and Latin America.

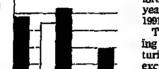

By William Dawkins in Tokyo

Companies' reasons for investing overseas have also changed. Until recently, Japanese manufacturers were driven abroad by the need to reduce trade friction and avoid rising domestic costs imposed by a high yen.

Now, more companies are setting up local headquarters with decision-making responsi-bility, especially in Asia, to establish relationships with regional economic blocs and adjust to the reduced role of manufacturing in Japan's economic structure.

These local units reinvest twice as much profits as they did five years ago - 60 per cent towards servicing regional markets, rather than export-

The Lloyd's of London insurance market is attempting to boost support among hard-hit members for its ambitious recovery plan by drawing up a "blacklist" of Names whose misconduct led to massive losses for the insurance market

The move is intended to prevent those responsible for creating Lloyd's past problems from benefiting from a proposed £2.8bn (\$4.3bu) out-ofcourt settlement offer for lossmaking and litigating Names which is part of the plan.

As the principles on which the settlement fund would be

distributed were unveiled yes-terday, Lloyd's also indicated for their losses. The Associathat it was stepping up efforts to increase the size of the offer Possible sources of additional finances include bank loans or contributions from brokers and auditors working

but there was no guarantee the total could be increased. LLOYD'S OF LONDON Lloyd'a said that, if its recovat the insurance market. As ary plan were implemented, well as the settlement offer, some 5,000 members would receive cash payments. More than 9,000 would benefit from the recovery plan includes proposals to transfer many into a reinsurance company. plans to limit demands for pay-ments to no more that £100,000 Names' representatives are pressing for extra funds to soften the cost of setting up after funds deposited at Lloyd'a have been exhausted. shows it to be larger than

derivatives was \$278bn. This means the UK had a 27 per cent share of the

\$270bu average daily worldwide turnover in OTC derivatives contracts and a 31 per cent share of the \$892bn turnover in forex-related derivatives.

Derivatives are financial instruments which reflect the value of underlying financial assets. They are traded either on an exchange or between two counterparties on an OTC basis.

The survey is part of a global exercisa carried out under the anspices of the Bank for International Settlements.

Document explains how settlement might be organised

By Ralph Atkins

Lloyd's of Loudon yesterday set out to answer a near impossible question - how to distribute fairly the limited funds available under its recovery plan among thousands of lossmaking and litigating Names. . Its complex document - outlining

broad principles rather than actual numbers - forms the latest stage of Lloyd's plan to break from its troubled past. Lloyd's hopes to draw a line under

its problems this summer. These

have resulted in losses of more than ported the insurance market. £8bn (\$12.3bn) in recent years. It hopes to end to Names' legal attempts to gain compensation for losses and plans to spin billions of pounds of US environmental and asbestos-related losses into a separate reinsurance company, Equitas. The reinsurer would be funded

from Names' resources (helped by the settlement offer) and provide "finality" - capping Names' liabilities and allowing them to leave the market. Names are individuals whose assets have traditionally sup-

Compromise seems inavitable. Names' representatives insist that the £2.8bn settlement offer is insufficient. Mr David Rowland, chairman of Lloyd's, acknowledged that not everyone would be happy. "It is just not possible to do all the things that we wanted," he said.

Yesterday'a document is about finding a workable means of distributing the £2.8bu fund. It is skewed, perhaps inevitably, towards helping litigating Names who, under the proposals, would receive 75 per

cent of the total. The document proposes dividing £800m of the total among those defined as active liti-gants at the end of last year. Litigation expenses would be refunded to qualifying groups.

Names would then be awarded a proportion of their losses according to how far their cases had proceeded. reflecting the realities of legal life in which those who make it to court first win the biggest share of funds available for damages awards. Unlike the last attempt at an out-of-

despite having the funds to do so. It After handing out the £800m an additional £2bn in "daht credits" would be allocated pro rata to Names' finality bills, excluding would be allocated to all Names in unpaid called losses and sums owed to Lloyd's central fund. four tranches. UK NEWS DIGEST Shell faces island opposition The States of Jersey, the island's parliament, will today vote

on whether to revoke a property lease held by Shell, the Anglo-Dutch oil group, because of the company's involvement in Nigeria. Members of the States must vote on whether to extend Shell's lease for an aviation fuel storage facility at Jersey airport. Jersey is the largest of the Channel Islands between England and France.

Critics of the company say it is "unfit" to hold the lease because "it has blood on its hands" in Nigeria. The company said a vote to rescind the lease would be seen as a signal that Jersey "no longer wants Shell on the island." Mr Ken Soar, managing director of Shell's Jersey operations, said he "has every expectation that the lease will be renewed."

Senator Stuart Syvret, a member of the States, raised the issue of Shell's Nigerian involvement two weeks ago. Since then seven of Jersey's 53 elected representatives have publicly expressed support for revoking the lease. With no political parties in Jersey each legislator will be able to vote freely. Shell, which has operated on Jersey for 40 years, has 60 per cent of the island's petroleum market. It employs about 100 islanders. Robert Corzine and Sue Stuart

be no attempt to weigh the strength of each legal action.

Bonds profit returns

The UK's Gilt-edged marketmakers (Gemms), the official dealers in the government's debt, returned to profit last year after a disastrous year in 1994 when the sudden fall in bond markets Caused them to lose £60m. But dealers were surprised that the operating profit of all 20 Gemms was not higher than the £13m published in the Bank of England's annual review of the UK government bond (gilts) market. The 1995 profit figure is particularly low compared with previous years. Germs made profits of £59m in 1993 and £64m in 1992. "Tha 1995 number seems to suggest that some Germs lost money again," said Mr Don Smith, gilts strategist at HSBC Markets. The Bank offered no clues as to which Gemms had made losses other than to say that "a profit was reported by nearly half the Gemms which were active throughout 1995".

Antonia Sharpe, Markets Staff

Manufacturers hold prices

Inflationary pressures in industry eased last month as raw material costs fell and manufacturers kept the price of goods at the factory gate unchanged for the first time in almost two years. The better than expected figures underlined the slow-down in manufacturing since the middle of last year, with weak demand making it difficult for producers to pass on price increases to customers. Factory output prices - excluding volatile food, drink tobacco and petroleum prices - were unchanged between December and January. This was the first time prices were unchanged since April 1994.

Accountants scrap merger

Two of the UK's leading professional bodies for accountants have abandoned attempts to merge. The Chartered Institute of Management Accountants and the Institute of Chartered Accountants in England and Wales had asked members by accountaints in England that what the merger plan. The two questionnaire what they thought of the merger plan. The two hoped to put the issue to a vote in June. A series of joint meetings across tha UK had appeared to indicate widespread accountants replying backed the idea in contrast to more than 30 per cent of the management accountants.

Mr Keith Woodlay, president of the chartered accountants, said: "The gap is too great; It's too big a hill to climb." Mr Alan McNab, president of the management accountants, said he would "draw breath" before considering what to do. The failure of the marger, the latest failed marriage among the six leading bodies may closel a new period of cooperation short leading bodies, may signal a new period of co-operation short of merger. Last week the public sector accountants and the Scottish chartered accountants agreed a joint membership scheme. Jim Kelly. Accountancy Correspondent

Soccer coach wins stay

Mr Terry Venables, the England soccer coach, won a postponement of the High Court case in London in which the Department of Trade and Industry seeks to have him disqualified as a company director. The case was adjourned to July 15 after the Football Association asked for Mr Venables to be allowed time to concentrate on managing the national team in the European championships. The department has levelled 19 charges of unfitness against Mr Venables regarding his directorships inside and outside football

NEWS: UK

Time Warner and MAI to build \$346m complex

By Raymond Snoddy, Scheherazade Daneshkhu and Alice Rawsthorn

10

Time Warner, the US entertainment group, and MAI, the UK media company, will today announce plans to invest £225m (\$346m) in a theme park in Hillingdon, west London, which will include a movie and television studio complex. MAI is planning a 13bn merger with the United News and Media newspaper group. The Hillingdon complex, to be

called Warner Brothers Movie World, will include studio tours. It could be the first new movie studio complex to be built in Britain since

After the bomb

have the potential to employ more than 3,500 people. It will be run as a 50/50 joint venture by the two companies. Time Warner and MAI are already involved in a successful sim-

ilar scheme in Australia. The UK Movie World will be based at a 62ha site which now houses sports facilities including a ski slope and an outdoor swimming pool. Those would be transferred to another site.

Planning permission will he required for the project because the site is on protected "green helt" Banks in City say their security concerns have not increased 🗷 Bell CableMedia shifts 200 staff to suburb

the second world war. The complex land. Hillingdon Council is likely to is scheduled to open in 1999 and will support the project because of the employment potential.

The location is designed to exploit the skills of the large number of film and television professionals who live in the area, which is close to both Pinewood and Shepperton film studios and the BBC Television Centre. The plan is part of the proposed merger between United, publisher of the Daily Express and MAL which owns Anglia Television and controls

Meridian Broadcasting. The plan is likely to attract attention from potential predators interested in intervening in the United-MAI deal.

film and lelevision production facilities in the UK. The number of films made in the country has risen recently as the financial strains on the domestic film industry have eased. A number of Hollywood studios have shot hig-budget pictures in the UK, including GoldenEye, the latest James Bond film, and the forthcoming Mission Impossible.

Pinewood, the long established sludio owned by the Rank Organisation, is already operating at full capacity. Shepperton, its long standing rival, is being renovated after

The news of the Movie World proj-ect comes at a time of expansion for Brothers. Tony and Ridley, two of so successful. the UK's most successful film direc. tors in Hollywood.

Plans were recently announced for a new production complex, Third Millennium Studios, on an old airbase in Leavesden, to the north of London, where GoldenEye was shot. London, where Gouckeye was shot. The company behind the project is Millennium Group, part of George Town Holdings, a Malaysian concern. Despite these developments Time Warner and MAI are convinced that there is demand for additional studio capacity in the UK, particularly as the film production part of

of Time Warner which has produced a string of box office successes including the Barman series, would be expected to shoot some of its pictures at Hillingdon. Similarly MAI would use the studio for Anglis and Meridian, its television companies. The Hillingdon venture will be the first big theme park investment in the UK since the £80m invested by the Lego group, the privately-owned maker of toy bricks. Its Legoland park at Windsor is due to open at the end of next month.

Minister * aims to convince investors By Robert Taylor,

Employment Editor

The government is launching a campaign outside Britain to try to convince potential investors that the country has the most successful labour market of any comparably sized state in the European Union

Mrs Gillian Shephard, the education and employment secretary, intends to visit Paris this week with a pamphiet which claims that the UK has one of the lowest unemplayment and highest employment rates in the RU. It says that last December

unemployment was 8.6 per cent in the UK and Germany compared with 11.6 per cent in France and 12.6 per cent in Italy. It says 68 per cent of working-age population are in employment in the UK compared with 65 per cent in Germany, 59 per cent in France

and 51 per cent in Italy. "Compared to our EU neighbours we are doing rather well," Mrs Sheppard said yesterday. "We have more people in work and less people unemployed than virtually any other major EU country."

Mrs Shephard claimed that excessive regulation in other European labour markets was patting people out of work and that the social chapter of the Maastricht treaty and the existence of a national minimum wage were adding to their

"Britain has fewer regulations which can add to the cost of employing people and deter employers from the recruiting extra staff as sales and ontput rise", says the pamphlet.

The rosy picture of the British labour market painted by the government was attacked last night by Mr Michael Meacher, the opposition Labour party's shadow employment secretary. He pointed out that between 1979 and 1994 there had been a net fall of 0.1 per cent in the size of the DK's employed

Early in the next century, if all goes according to plan, they will have their chance. A Nasa space probe will be despatched to gather comet material from one of these vagabonds of the void, then return the sampla to earth for detailed

As many as a thousand billion comets are thought to exist in the furthest reaches of the solar system. Residing in a region called the Oort Cloud, the gravitational tug of passing stars sends them inwards toward the sun. Once bathed in sunlight, these clumps of ice, rock and dust form long tails many millions of kilometres long. Some scientists not only believe a

comet was responsible for the extinction of earth's dinosaurs, but also that they were part of the process that led to the creation of life on earth.

It is no wonder, therefore, that scientists are eager to gain a firsthand look. The European Space Agency is set to have its automated Rosetta spacecraft survey comet Wirtanen in 2011. Once orbiting the comet, Rosetta will then place robot surface landers on the ancient clump of icy rubble a year later.

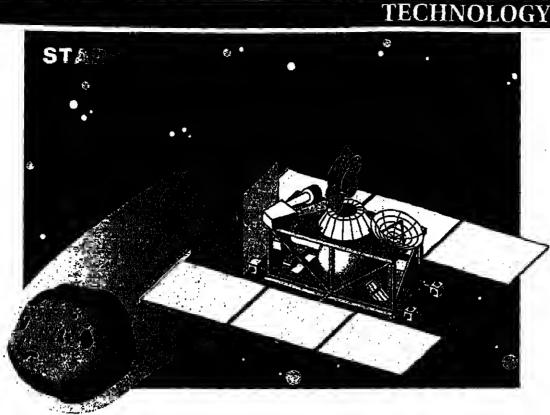

But the Nasa programme, for which the go-ahead was given late last year, is sure to prove a valuable pathfinder for the Rosetta mission.

Nasa's multibillion-dollar missions are nearly over because of ever-tighter space budgets. The comet probe, called Stardust, is a Discovery-class spacecraft, one of The space agency's naw breed of cheaper, faster automated craft. Under construction at Lockheed Martin Astronautics in Denver, Colorado, it will weigh just 250kg, and the whola mission is expected to cost just under \$200m (£130m).

Stardust's mission begins with a lift-off scheduled for February 1999. Its target is comet Wild-2. The probe will capture two types of particles: dust grains from the cloud of particles, or coma, that surrounds the comet, as well as grains streaming into the solar system from interstel-

lar space. These interstellar grains are par-ticles that are formed around other stars, ie stardust. Hence the name of the mission.

Stardust will reach Wild-3 in January 2004, and will rendezvous with the comet when it is roughly 280m km from the sun. The spacecraft will zip by the comet at a distance of 100km, collect samples of dust, then head towards earth. A return capsule holding its precious cargo is .

Catching the comet

A Nasa space probe may give new clues to the origins of the solar system, reports Leonard David

to parachute to earth and land on a dry Utah lake bed in January 2006. Stardust's chief comet-catcher is

Donald Brownlee, a scientist at the University of Washington in Seattle. "The materials we expect to capture and then study on earth are the initial building blocks of planets both in our solar system and in other planetary systems in the galaxy

Brownlee points out that Stardust carries a secret weapon. "The capture technique for collecting the comet and interstellar dust samples is unusual. It requires a magic material, an enabling technology that makes the whole mission possihle." he says.

The odd, fluorescent material is called aerogel. It is porous, and somewhat like glass in that it is made of silica, a pure form of sand. It does not absorb moisture, hut can soak up large amounts of gas or particle matter. The lightweight aerogel is the lowest bulk density material made in the world.

Sheets of the aerogel about 1cm thick are designed to pop out of Stardust. They will snag as many as Im particles of interstellar dust and comet material while the spacecraft whizzes through space.

The velocity of the particles hit-

ting the aerogel will be some 20 to ing the close encounter. 30 times the speed of a rifle bullet, notes Peter Tsou, Stardust's deputy principal investigator at the Jet Propulsion Laboratory in Pasadena, California.

Tsou is concocting batches of the aerogel for Stardust. When a speeding particle strikes the aerogel, it creates a very long, cone-shaped track as it slows and stops. Catching the particle fragments in the acrogel should leave them unmelted and unvaporised. That process has been dubbed "intact capture" by Tsou.

nce Stardust has made its run at the comet, it will retract its aerogel plates into a re-entry capsule. "The value of those particle fragments is like pieces of an old vase for an archaeologist. Digging up those chips, that archaeologist can reconstruct the whole vase," Tsou says.

During its close flight past of Wild-2, Stardust will also snap sets of images with a camera and take other measurements. Numbers of "head shots" of the comet nucleus should reveal features just a few metres across. A special dust shield protects Stardust from destructive collisions with comet material dur-

Scientists expect images with 10 times the clarity of those taken of comet Halley by the European Space Agency's Giotto spacecraft in

After nearly seven years of trek-king through space, Stardust's trajectory will return it near earth. The spacecraft will then release a 20kg re-entry capsule holding the specimens of comet dust and gases, as well as interstellar dust in a sample vault.

The capsule's coating of a sophisticated carbon-based material and its shape will belp beat the heat as it plunges through earth's atmosphere. Inside, the contents will feel no higher temperature than 50°C. Once landed the real work will begin. Extricating Stardust's prize catch, various micron-sizes of particles embedded in the aerogel, will

be demanding. An array of electron microscopes, spectrometers, and other devices in laboratories around the globe are to be used.

From these tiny particles, it is hoped that new information can be realised concerning the big picture - fresh evidence regarding how the solar system was formed and, per-haps, new clues to the origin of life.

Cosmic collision that could end humankind

Miranda Eadie on arguments that more should be done to prevent large meteorites reaching earth

p to \$20m (£13m) should be spent each year designing systems to protect the earth from a cometary collision that would wipe out the human race, says Edward Teller, a leading arms expert and authority ou cometary impacts.

"A comet 10 miles across hit the earth 65m years ago, killing two-thirds of all species and bringing the age of the dinosaurs to an end," says Teller, director emeritos at the Lawrence Livermore National Laboratory in California. "I believe there is a one in a million chance of a similar incident occurring in our lifetime." An even greater threat to bumankind in terms of frequency

of impact is bombardment by comet fragments. A chunk as little as 50m across would cause destruction

equivalent to a large nuclear bomb. In 1908 the 100m Tunguska meteorite flattened more than 1.000 sq miles of forest in Siberia. Comet experts estimate that such events occur once every century or so. Had the meteorite fallen on a city such as New York, millions of people would have been killed.

"The most likely damage will occur when a meteorite like Tunguska hits an ocean within 100 miles of shore," says Teller. "It would stir up monster waves that would wipe out the entire coastal population - a possible 30m people if it happened off the US or Japan. The cratered landscape of the moon shows the damage comet

impacts can make. Craters are not so evident on the surface of the earth because

ological processes such as ge weathering bave erased them. Also, the earth's etmosphere means that normally only meteorites measuring more than 10m across have a chance of reaching the

surface without burning up. But some small fragments do reach the ground, such as the 12kg meteorite that punched a hole in a car in Peekskill, New York, in 1992.

There are also the 150 tons of fragments which fell over a 2km swathe in the Sikhote-Alin Mountains of eastern Siberia in 1947, creating at least a 100 craters a few metres in diameter. The larger fragments would have

hit the ground with a force comparable to that of a car falling

An artist's imp

at supersonic speeds. According to Nasa, such instances occur once every decade although most occur at sea and are not reported. The probability of larger fragments reaching earth is smaller. Meteorites that are at least 1km wide hit the planet once every 1m years while 10km meteorites come once every 50m to 100m

years. Nasa claims there are more than 100 ring-like structures on earth recognised as impact craters. These include the 180km-wide Chicxulub Crater in the Mexican state of Yucatan, probably caused by a 10km-wide asteroid, which is thought to have wiped out the dinosaurs. "It is speculated that the greatest damage was caused by the dust clouds thrown up by the impact. These clouds blocked out the sunlight causing plants, then herbivores and finally carnivores

to die." says Teller. He believes scientists should be tracking comets and asteroids to predict collisions, sending up probes to learn about their composition and testing whether violent impacts - such as nuclear explosions - could alter their orbits. "We could have as little as three months' warning if a come was heading towards earth," Teller says. "If we do not know in advance how to deflect it the situation would be very problematic." The use of nuclear and

non-nuclear interceptors to deflect oncoming objects or smash them

into bits that would burn up in the earth's atmosphere was discussed at a planetary defence workshop in California last year. One method proposed was to use

11

a solar collector to beat a spot on an asteroid or comet. This would vaporise part of the object creating a jet of gas that would push it off-course. A nuclear device that would require the equivalent of 1bu tons of TNT to pulverise a 100-ton asteroid was also discussed. Public awareness of the threat of cosmic objects colliding with earth

has increased recently, not least because of the spectacular collision between fragments of comet Shoemaker-Levy and Jupiter in 1994.

Added to this is the geological avidence - uncovered as recently as the 1970s - which backed up the theory that a cometary collision with earth was responsible for wiping out the dinosaurs. A quantity of iridium, a predominantly extra-terrestrial element equivalent to what would be contained in a 10km asteroid. was found at the cretaceous/ tertiary boundary in the rock strata, which marks the end of the age of the dinosaurs.

But nuclear disarmament activists are sceptical. Some believe public fear of cometary impacts has been aroused in order to justify maintenance of nuclear weapons. The sceptics question whether a large nuclear arsenal might not pose a greater threat than the comets and asteroids.

LAW

Part-time work discrimination

12

training course EUROPEAN was capable of COURT constituting indirect sex discrimination

contrary to the Treaty of Rome, the European Court of Justice ruled last week.

compensation

workers for

staff council

to part-time

The case was brought by Ms Johanna Lewark who was the only part-time worker on the staff council of a dialysis centre in Germany.

In 1990 she ettended e fiveday staff council training course. Under German law staff council members must be released to attend auch courses without loss of pay.

The full-time workers were paid their normal salaries and Ms Lewark was paid for four days, which was her contrac tual working period. Sbe brought an action against the company in the local labour court on the grounds that failure to pay ber for the fifth day amounted to sex discrimina-

tion under European law. The court upheld her complaint. On appeal the Federal Labour Court also found in ber favour hut said staff council functions did not constitute work within the Rome Treaty terms and that as the relevant provisions only referred to equal pay for equal work they could not have been breached.

The court also said that as all workers, full and part-time were protected in the same way against loss of wages as a result of attending sucb courses, it could not be said that full and part-time workers were treated differently. As the European law position was unclear, however, it referred

the case to Luxembourg. The European Court of Justice first recalled that legal concepts and definitions established by national law could not affect the interpretation or binding force of European law.

The concept of pay under the treaty equal pay provisions comprised any consideration, in casb or kind, providing it was received, albeit indirectly, in respect of employment.

As to serve on a company's council, one bad to he employed by that company, the

Bu

court said the compensation received for loss of earnings due to attendance of staff council training courses constituted pay within the terms of the relevant treaty provisions.

The court also recalled that unequal treatment arose whenever the overall pey of full-time employees was higher than that of part-time employees for the same hours worked. The court said it was indis-

application of the national

putable that where training was organised during full-time working hours but ontside individual hours of part-time workers, the overall pay received by the part timers was lower on an hourly basis than that received by full-timers. Given that there was e difference in treatment hetween full-time and part-time workers and given that the majority of part-time workers were women, the court aaid the

CONTRACTS & TENDERS

ENTE MINERARIO SICILIANO (Sicilian Mining Authority)

For sale with Tax losses.

Good order book and

fully restructured.

Abstract of Call for Bids for the Sale of Equity Interests

EMS (Ente Minerario Siciliano), Via Ugo La Malfa No 169, 90146 Palermo, Italy, an Authority subjected to the tutelary control of the Sicilian Region

INVITES

interested private individuals or corporate bodies of any nationality, either singly or in association but with joint responsibility, to present proposals for the acquisition of the controlling equity interest (51%) in the corporate capital of the Società Italiana Sali Alcalini ITALKALI S.p.A., with seat in Palermo, Via Principe Granatelli No 46.

The offers, containing a brief professional profile of the presenter, must refer to the entire controlling interest and must be irrevocable until 30 June 1996.

EMS is under no obligation to eccept the offers or to justify failure to accept them, as it has complete and absolute freedom of choice, without any obligation towards the presenters, also in relation to any expenses that may have been incurred

Offers must reach the seat of the Authority by 30 April 1996 in order to be taken into consideration.

A specially prepared information booklet will be sent to those whom EMS considers suitable for admission to the procedure of assignment and who, before the deadline established by the Authority, have undersigned and returned an undertaking of confidentiality, together with a report containing a description of their activities and their motivations and programmes as regards investment and the reabsorption of staff in a state of mobility.

This notice does not constitute a public offer as per Art. 1336 of the Italian civil code nor is it an invitation to public saving as per Law No 216/1974 and later modifications. It is subject to Italian law, as also the procedure of assignment. All controversies arising herefrom will be heard exclusively before the Court of Palermo.

The full text of the call for bids presented in this abstract will be published in the Official Gazette of the Sicilian Region parts II and III No 7 of 17 February 1996 and in the Official Gazette of the Italian Republic part II No 40 of 17 February 1996.

The Italian text of the call for bids will have priority over any other version published in foreign languages.

Address tender to: Ente Minerario Siciliano, Servizio Partecipazioni, Via Ugo La Malfa 169, 90146, Palermo, Italy.

Tel.: +39.91.6958111; Fax: +39.91.6958610.

Legal Representative

Public tender for mobile communications, etc.

On 6th December 1995 a broad political agreement was reached in Denmark concerning the future framework for full liberalization of the telecommunications market

This agreement provides the basis for legislation which will open up a number of new opportunities in the course of 1996 for doing business as an operator or eervice provider in Denmark.

Thus, in Denmark, EU'e deadline for general liberalization, 1st January 1998, has been brought forward to 1st July 1996. With regard to mobile communications, frequency resources are a limiting factor (a.g. for DCS 1800 and ERMES), causing an upper limit on the number of new operators who can be given a licence.

Consequently, the preparations for a public tender have begun, involving not nnly a Bill on wide-ranging liberalization of mobile communications in Denmark, but also the preparation of tender material to be used by potential operators when submitting tenders for consideration when licences are issued.

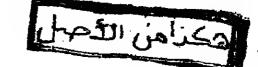

The tender will not be limited to a specific technology, but future operators will be given the opportunity to combine various technologies and services. Thus, it will be possible to combine DCS 1800 (for nationwide, regional and local use) and ERMES with both fixed-network technologies or othar mobile technologies such as DECT (in Denmark DECT

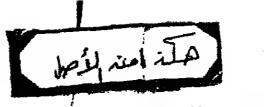

will be fully liberalized as of 1st July 1996). In addition, access to service provision by the use of existing mobile networks (NMT, GSM, ERMES, OPS) will be guaranteed by law as of 1st March 1997.

A new mobile-sector Bill is expected to be introduced in the beginning of April 1996. The National Telecom Agency in Denmark (Telestyrelsen) expects to be able to issue preliminary tender material containing conditione for applications immediately after the introduction of the Bill. The final tender-material will be issued, when new mobile legislation has been adopted, i.e. expectly in the middle of June 1996. Further information will be announced in advertisements placed in newspapers, "Statstidende" and "The Official Journal of the European Communitiea" immedialely before tender material

Any interested parties may addrese inquiries in writing to the National Telecom Agency, Holsteinsgade 63, DK-2100 Copenhagen Ø, which is responsible for the tender, thareby obtaining information about specific organisation of the public lander. Inquiries can also be made to Finn Petersen, Head of Regulatory Division, telephona number (+45) 35 43 03 33, axt. 630.

National Telecom Agency Denmark

William Packer reviews the sculpture of Umberto Boccioni

ore than ever in these days of large exhi-bitions, with their doorstep catalogues and queues round the block, the small study exhibition, finely chosen and to the point, has its place. An intriguing example is now in Venice, centred upon one sculpture by the Italian Futurist, Umberto Boccioni, at the Peggy Guggenheim Collec-tion. It has two aspects, particular and general: the one concerned with the work itself in its physical state, the other with the development of the image in relation to the art of the time, both academic and avant-garde. Boccioni was killed by a fall

from his horse whila serving in the Italian cavalry in 1916. Ha was 33 and his engagement with Futurism had lasted barely seven years. Within that short span, his involvement with sculpture had been serious if intermittent, yet determining his intentions remains problematical. He worked with all kinds of material - clay, card, wood, metal, plaster adapting and improvising in the way of Picasso and Cubwism, picked up in Paris before the war, But little of what he did survives, for such an approach leads inevitably to work that is open-ended and physically vulnerable. What few bronzes there are were

one to survive in its working

nine nie beweiten. cast posthumously, and there is no certainty their state is what he would have wished, The Guggenheim "Dynamism of a Speeding Horse + Houses" of 1915 takes on, therefore, a unique importance as not merely the last of Boccioni's sculptures, but the only

tion.

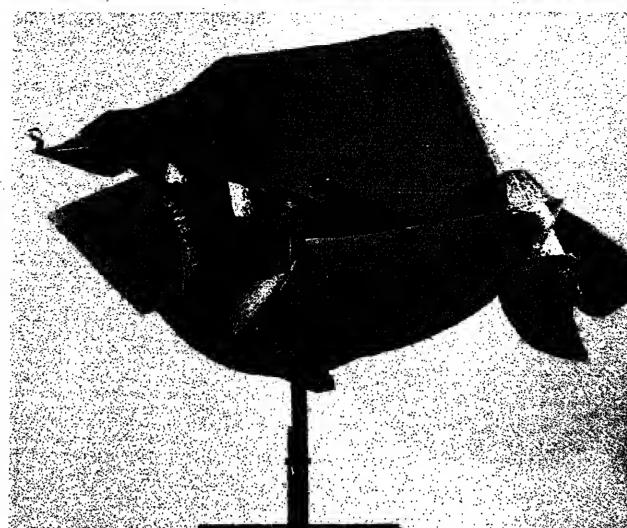

state. It is was bought by Peggy Guggenheim herself in 1958, against the conventional wisdom of the time, when Futurism was still seen as lit-tle more than e minor provincial sport of Cubism. Long felt to be but an unshowable curiosity, it now emerges newly-restored as one of the most remarkable and important pieces in the entire collect is indeed a curious and impressive thing, e for-

mal abstract bundle of painted wood, card and metal perched on a post. Or so it seems at first, but soon, without any lessening of its particular and eutonomous physical presence, other read-ings and responses creep in. We move beck from the abstract, as it were, to the abstracted, as we begin to register the body of the horse and the straining neck, and the houses beyond. The working drawings nearby tell us that the sculpture is incomplete, for there are no legs but only stumps. Perhaps they were there but have been knocked off, redundant to the final simplification and formal unity of the piece. We can never really

know. What Boccioni was attempting was the physical embodiment not of mass but of movement into our real, shared space - a contradictory impossibility, of course, in a solid and static object, but then all art is contradiction in some degree. He was indebted to the Cubists for the trick of simultaneity in the reading of form, through the opening-out and interplay of its many facets. Yat he condemned them for their final dissolution of form

Concert/Richard Fairman

tured.

ARTS

Boccioni's 'Speeding Horse': the test-bed of the Futurist artist's enquiry into mass and movement

into detail, whereas he sought its ultimate integrity, each ele-ment serving the ideal whole. His "Speeding Horse" is the surviving tast-bed of the enquiry

But the show's more general point is no less interesting. Much as Boccioni may have protested thet "we Futurists are the sole primitives of a new sensibility, completely transformed", the fact remains that he, quite as much as any artist, was inevitably the creature of his age. In setting this broader con-

text, Fred Licht, the show's curator, has not contented himself simply with following

Boccioni's own personal obsession with the horse, from his early graphic Illustration to the metamorphic symbolism of the later paintings. Nor has he merely brought in comparative Italy.

examples by Boccioni's Futurists and quasi-Cubist peers - e collage by Carra of e racing horse; a bronze by Duchamp-Villon of a horse's head as an abstract image of power. Rather he has looked further afield to the animalier sculpinand of Genoa (1877) steps

ture of Barye and Meunier, and to the horse maquettes of Degas, that would seem to leap out beyond their restraining bases into the real space of the viewer. Further still, he bas

looked to the monumental and for too long, but suddenly they are visible once more, thanks memorial sculpture that in the last quarter of the 19th century to such as Fred Licht and his began to appear to the glory of revivionist fellows. Ballet/Clement Crisp Rambert goes for roguishness

bave learned to mistrust dance-works in which performers make entrances from the anditorium. No good can come of such roguishness - and so it proved again on Thursday afternoon in Brighton's Theatre Royal, where Rambert Dance Company is installed this week. The closing piece of the programme was new: Didy Veldman's Kol Simcha, which is Hebrew for Voice of

Celebration Up from the orchestra pit came a raggle-taggle group of musicians and dancers to make their winsome way onto a bare stage, playing and acting their heads off. I disliked them all: for their awful clothes (Sasha Keir bas been to an Oxfam shop for really disconsolate outfits); for their oh-so-relaxed manner; for hitting tambourines; for pushing themselves across the stage in wooden crates. And my heart sank as one girl decided that she would try to make an entrance from the middle of the stalls. So cute. So tiresome. What ensues is a drunken romp, Everyone drinks from

bottles, which is not the loveliest sight, and one girl daintily spews wine on to the stage, to the sound of Adam Gorb's new score, which I hazard is inspired by Kletzmer music - replete with sobs from violin and clarinet. Of purpose, choreographic wit, I could find little trace as the

already. The rest of the programme is vastly to be preferred. Rambert's dancers are on best form. Christopher Bruce's Stoan Song was done, as ever with passionate involvement hy Glenn Wilkinson as the prisoner, Steven Brett and Vincent Redmon as the interrogators. And I was also be see for the first time Mark Baldwin's Bonter Bonter. This is a a piece for three couples whose light-bearted reactions are bantering reponses to Stravinsky piano music (the early studies, the Tango, the three easy pleces, the little sonata, admirably played by Stephen Lade). The dance is allusive,

quick-witted, and has sufficient quirks to tell us that **Baldwin understands wbat** Stravinsky is doing. It is given with split-second timing by the men - Paul Liburd especially fine and extra-sec The women seem slightly too eager to let us know what fun it (and probably life with a macro-biotic diet) is. I wisb they wore more make-up and less cbarm.

Rambert Dance Company tours with two programmes to Northampton, Oxford, Canterbury, Mold, Swansea Nottingham until the end of March.

Theatre/Ian Shuttleworth The making of a martyr

> William" acquires the force of a juggernant.

Director Irina Brown and designer Paul Andrews create a commanding succession of images (with an acknowledged debt to Brueghel and Bosch) against the bare old brick of the Playbouse stage, hung ecross with e curtain of chains. Brown echieves e fine medium between striking visuals and implied acts when depicting the ordeal of the boy William (played by 13-year-old Ashley Jackson) at the bands of the Archdeacon's co scene periodically repeated as a commentary upon the growing fervour. The play is largely an ensemble piece, with most actors playing several brief, bold roles and only individual moments emerging from the quickening current. Of the main players, Jonathan Bond is occasionally excessive with the Celtic fire of Thomas, compelled too often in the later scenes to over-top himself, whereas Stephen Webber's Ellas is a figure of worn granite. Blood Libel undonhiedly acquires added potency from being performed, as it were, on the scene of the crime; nevertheless, its admonitions about the force of unfounded convictions and the perils of equiescing to them for pragmatism's sake are universally trenchant.

new book hy Paul Hirst, a professor at Birkheck College. London, and Grahama Thompson, a senior lecturer at the UK's Open University*. Any book that cootains such sentences as "the first major con-sequence of a globalised economy would thus he the fundamental problematicity of its governance" can hardly be fun to read. Yet its chief argument is right. On their own or together governments can do a great deal. The dehate should be over what they should do, not over whether they can do anything at all. The fundamental theme of

globalisation, argue the authors, is the proposition that the world economy "is dominated hy uncootrollable global forces, and has as its principal actors and major agents of change truly transnational corporations, which owe allegiance to no natioo state and locate wherever in the globe market advantage dictates"

The first thing to appreciate is that the openness of ecooomies today is no greater than before 1914. Trade in merchandise as a proportion of the gross domestic product of major industrial countries is, for the most part, no greater than it was then (see chart). As for capital mobility, UK capital flows were 61/2 per cent of national income between 1905 and 1914, larger than for any major industrial country. including Japan, in the 1990s and 1990s. Labour migration is

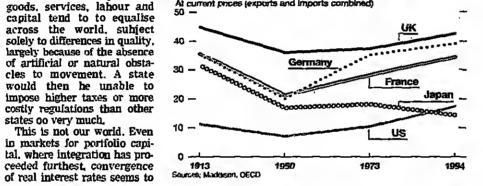

also far more restricted now be less than undar the old gold standard. An explanation for this may well be the uncertain domestic value of investment in securities denominated in exchange controls. It already foreign currencies under floatpossessed steam ships and ing exchange rates. Converintercontinental telegraph gence of real interest rates is cahles. As the authors note, more likely when exchange the difference between a world rates are credibly fixed, as

under the gold standard. Again, the ratio of govern ment revenue to gross domestic prodoct is 60 per cent in Denmark, against 32 per cent in the US. Yet there is no mas-sive outflow of labour from the former to the latter. Despite high rates of tax, the In addition to providing this Danish national savings rate has been higher than that of the US. Denmark's capital has needed historical perspective, the authors attempt the more difficult task of defining a also largely stayed at home: in 1995 the country's net accumuglobal economy, which they distinguish from a merely lation of foreign assets was a "international" one. The lat-ter, thay say, is one in which modest 1.8 per cen1 of GDP.

if global economic integrathe principal entities remain tion is incomplete. it is also national economies, notwithfar from irresistible. Governstanding growing trade and foreign investment. By coo-

Ratio of merchandise trade to GDP At current prices (exports and imports co

ments have chosen to lower trade barriers and eliminate foreign exchange controls. They could, if they wished, halt both processes. Could the omnipotent multi-

national corporations of leftist nightmare stop them? No. hecausa corporate capital is also far from fully mobile. About three-quarters of the value added hy multinational corporations is still produced in their home countries. It is almost impossible to imagine Toyota or Mercedes-Benz shorn of their roots in one specific country. They may hecome more internatiooal.

But they can hardly he impervious to the actions of their national governments. Globalisation is, if not a myth, a huge exaggeration. Politicians have to struggle not with the tyranny of necessity, hut with the perils of choice. Two questions emerge: how to exploit the advantages

nomic fates of closed North Korea with relatively open Sonth Korea, Burma with neighbouring Thailand, or east with west Germany. Those countries that exploited the opportunity pro-

vided hy international commerce have prospered. But to do so they have had to pro-vide, at the very least, protection of property, high-quality education and good infrastructure. Some would argue, more debatably, that industrial poli-cies and other selective interventions were also essential. The same sort of people would tend to agree with Prof Hirst and Mr Thompson that international economic exchange needs more control. Where internationalisation is substantial, as in trade or finance, governanca does indeed need to be co-ordinated at a regional or global level. The question is only how much control of these activities there needs to be.

These authors have a relatively ambitious agenda, with strong regulation of foreign direct investment, greater exchange-rate stahility and more effective regulation of international financial markats high on their list. It is possible - nay necessary - to question their proposals. But to do so is to concede the book's chief point. Policy matters. The fault, dear Brutus, lies not in the economic stars, hut in ourselves that we make a mess of things.

*Paul Hirst ond Grohome Thompson, Globalization in Question (Blackwell, 1996),

In the chort occompanying last week's column, the general government financial deficit of Greece should have been 9.5 per cent. not 11.4 per cent, and that of Sweden 7.3 per cent, not 10.4 per cent.

of international commerce; and how to regulate it. The opening of national economies to international trade and capital flows occurred not because it was irresistible, but because it was heneficial. Contrast the eco-

know that the British security services told John Major as long ago as last summer that republicans would never swap guns for talks. So it is tempting to conclode that the prime minister should not have waited until the publication of the Mitchell report before dropping the precondition. Some are already arguing with spurious certitude that

the fateful moment came last mouth when Mr Major responded to that report by backing unionist calls for an elected Ulster convantion. Maybe. It seems just as likely that the IRA'a army council had decided anyway that it had had enough of peaca. For myself, I prefer a simpler per-spective. No donbt everyone made mistakes. But the hlame for shattering the peace resides with those who detonated 1,000 pounds of high explosive in London's docklands.

The tragedy is that the bomh represents a terrihla miscalculation hy tha IRA. Gerry Adams and Martin McGuinness have strutted the international stage these past 17 months. But the military commanders to whose tune the Sinn Féin leadership ulti-mately dances are trapped in the timewarp of republican history. The men of the IRA army council live in a closed world shaped hy the politics not of the 1990s hut of the 1920s and 1930s. Here, the supposed lessons of the past always take precedence over the opportunities of the future.

The British and Irish officials who talked with Mr Adams and Mr McGuinness encountered this mindset frequently. I am reminded of one British official who remarked that dealing with Sinn Féin was like negotiating with a Soviet delegation at the height of the cold war.

isb government has stated that The Sinn Féin leaders it has no selfish, strategic or arrived constrained by the tightest of negotiating briefs. If the British raised an unexpected point, their interlocutors would insist it be put to one side. They had first to consult. And lest Messrs Adams and McGuinness were tempted to explore heyond the boundaries set by their masters, they were never left alone. To each

meeting came the IRA's equivalent of a KGB minder, charged with reporting back to the army council. Thus, as history demanded, the political leadership remained subordinate to the military command. Then there was the visibly constant fear of a split, a legacy born of the rupture in 1921 when Michael Collins accepted Irish partition and, a year later, was murdered for his pains. As one of John Bruton's advisers explained during one perilous moment last year, the Sinn Féin leadership had always to carry with it the militants. Mr Adams wanted to huild a broad nationalist coalition, hut if a significant minority of the IRA's hawks pre-

A movement out of

touch with reality

ferred a return to war they would carry the day. These are relatively minor obstacles when set against the heaviest burden of republican history. In its isolation from the political mainstream, the IRA holds to a strategic analysis which has long since lost touch with reality. Many times

in the past few years the Brit-The blame for

shattering the

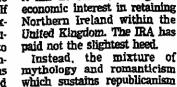

peace resides with

those who detonated 1,000

pounds of high

explosive in

which sustains republicanism makes the terrible mistake of assuming that the principal obstacle to a united Ireland remains the British government. It is as if the men of the IRA simply stopped reading the history books 50 years ago. They have not realised that Britain no longer has an empire, that its preoccupation with the Atlantic shipping lanes ended with the defeat of Adolf Hitler. If only, the terrorists say to themsalves, the Brits can be forced to leave, then the road to Irish unity will be clear.

It is a view which may still have resonance on the Falls Road, hut nowhere else. As the commentator Nuala O'Faulain wrote in the Irish Times yesterday: "IRA nationalism has nothing to do with us . . , the south has ceased to understand what most northerners still understand.

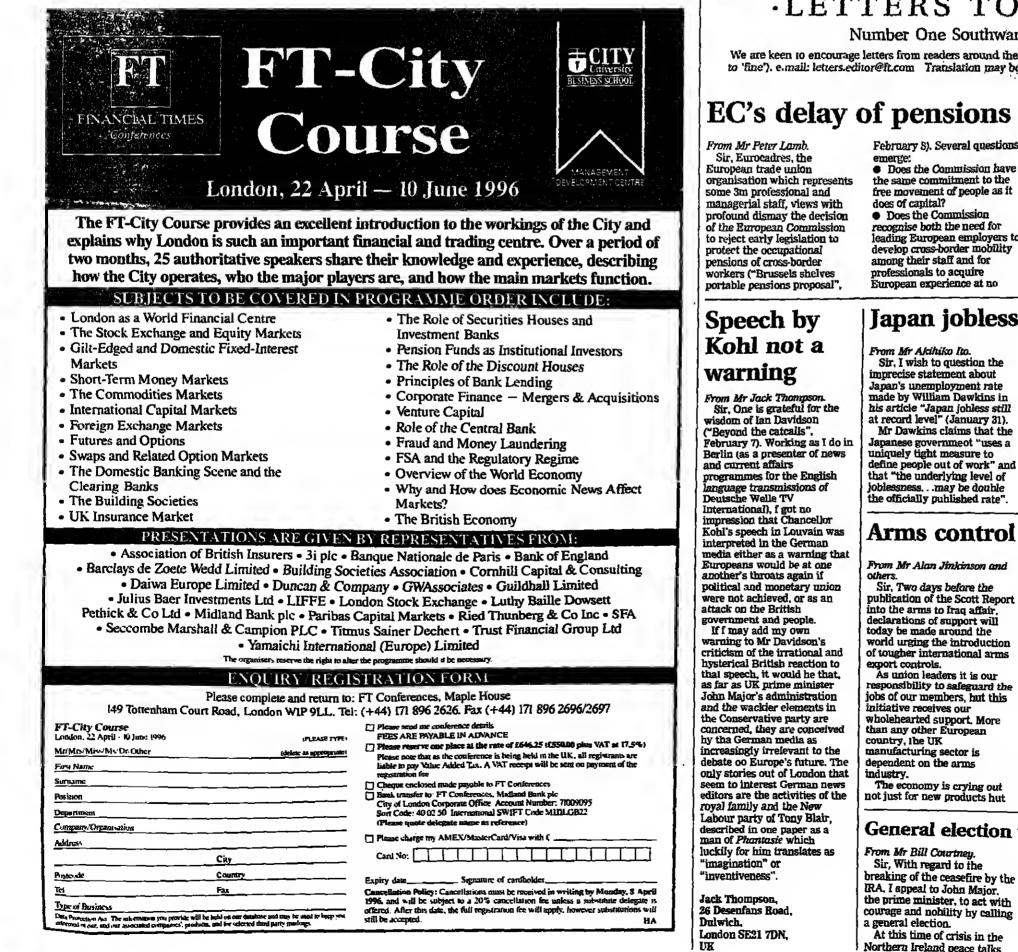

1.4

- . -

The IRA cannot bring itself to understand that the island of Ireland remains divided not at the whim of Mr Major nor of something called the British establishment but by the wishes of the people of the north. It is their fellow citizens in Belfast and Derry, not the English, who stand in the way of Republican amhition.

Maybe 70 years ago a government in London might have coerced Ulster into a united Ireland, though even then at the expense of further bloody conflict. It could never happen now. Sure, British administrations can from time to time put pressure on the unionists parties to negotiate. Perhaps Mr Major might have done more in that direction.

But another 25 years of ter-rorism would not allow the IRA to escape forever the central truth that it is Northern Ireland's democratic majority which wields the veto over Irish unity.

Prosecuting war crimes

Half a century after Nuremberg, the principle that war crimes should be probed and punished is still struggling to win acceptance. It is a sad fact of international life that very few signatories of the UN Charter and the Geneva Convention are prepared to draw the logical conclusions from those documents. Few, if any, governments sincerely support the prin-ciple that all gross violators of the laws of war should be held responsible, regardless of their cause and the outcoma of the conflict. But for anyone who does believe

the second second

..... ت. . .

in that principle, any development which helps to entrench it, and increases the fear of retribution must be welcomed. It is in that spirit that one should support the UN tribunals investigating the massacres which have claimed hundreds of thousands of lives in Bosnia and Rwanda. By punishing the worst culprits, the world community will not wipe away the stain of its own failure; but it will help to counter the argument that Realpolitik always wins over mor-

Many western nations hesitated before agreeing to the Bosnia tribunal, saying it could complicate the search for peace. Almost the opposite has proved to be the case. By indicting the most notorious Serb and Croat extremists, the tribunal has created conditions in which new leaders can emerge. So far, only one of 52 people indicted has been arrested and sent to the Hague, But their indictment has made it impossible for them to leave their fiefdoms in Bosnia to take part in negotiations. Yet for all its lofty purpose, the .

conduct of the Bosnian war crimes probe has become intertwined with expediency. As the higgest supplier of money and information to the tribunal, the US has secured invaluable leverage over

restructuring do not represent the

ations to advance much further in

the region's power-brokers. Crudely put, it can blackmail them by threatening to share the huge amount of intelligence it has gathered on the war. Already there are suspicions that the US is holding in reserve the information it must possess about Belgrade's role in the "ethnic cleansing" of Moslems in 1992. If Washington is somehow protecting the bosses of Balgrade, then questions arise about whether it really wants the Bosnian Serb leaders - Radovan Karadzic and General Ratko Mladic - to go the Hague, where

they would incriminate others. Nor is the Bosnian government above using the slogan of war crimes for political games. By arresting two senior Serb officers last week, it appeared at one point to have derailed the Dayton peace process, while neatly thrusting responsibility for the derailment onto the Serbs. An irreversible setback was narrowly averted yester-day by Mr Richard Holbrooke, the US envoy, who ruled that only the UN tribunal should decide whom

to detain. In an ideal world, the tribunal's authority would be established even more firmly, by giving it real institutional independence, and financial resources of its own. In an ideal world, the court would investigate with uncompromising rigour the behaviour of all parties directly and indirectly involved in the conflict, including both sides of the Croat-Moslem war of 1993. In the real world, that is too much to expect. But Nato forces could do more to help, even if they cannot hunt down war criminals They should co-operate more closely with the UN investigators and stand ready to arrest people if the opportunity arises. Ultimately, nobody responsible for the crimes perpetrated in Bosnia should feel confident of escaping justice.

Paralysed by indecision

COMMENT & ANALYSIS

Political unwillingness to sanction asset sales threatens the future of Italy's giant industrial holding company, says Robert Graham

he financial plight of Iri, Italy's ungainly giant of a state holding company has reached a critical stage. The holding company, which has annual revenues of almost L80,000bn (£33bn), risks a confrontation with Brussels unless it can reduce its mountain of debt by more than L20,000bn before the end of the year.

end of the year. Attempts to reduce the debt by privatising Irl's assets have been stalled by opposition in parliament. The previous Dioi government lacked the authority to press for-ward with privatisation and its suc-cessor is unlikely to have the deter-mingtion to do any better mination to do any better.

But witbout the rapid sale of some of its most valuable assets, there is a risk that the company could be put into liquidation. A discussion document for an Iri board meeting last week stated bluntly. "If iri fails to pursue its programme of divestments, there will be a financial crisis which will transfer debts of thousands of billions (of lire] on to the public accounts, and hence the state ..." The dominance that Iri retains in

Italy'a economy, which dates from Mussolini's attempts to develop indigenous industries in the 1930s, is unique in the European Union. The group has stakes in activities ranging from aerospace, airlines, banking, software and defence to motorways, televisioo and telecommunications, and accounts for 4 per cent of gross domestic product. But many of its holdings are in companies that are either making losses or former monopolies in sectors such as telecoms and energy which face competition for the first time.

At their simplest, Iri's financial problems stem from EU directives ending state funding for industries in member states. Under a 1993 agreement with Brussels, the Italian treasury was given permission to bail out Efim, a state industrial holding company, while it sold off or closed down its interests ranging from aluminium and glassmaking to transport and defence. The European Commission allowed government aid to the tune of L10,000bn on condition that this was Italy's last state subsidy.

As part of the agreement, the gov-ernment agreed to reduce Iri's debt to "levels acceptable to a private investor operating in a market economy" - in practical terms, to L4,562bn - by the end of 1996. To achieve this, Iri drew up an amhitious privatisation programme. Some 300 of the companies in its Deutsche Telekom later in the year. Mr Michele Tedeschi, Iri's chief executive, is considering various ways of privatising the telecoms group in the absence of a functioning regulator. The most interesting - and controversial - is to break it up into its constituent companies in domestic telephone services, international calls, mobile telephones. equipment supply and so on. This would allow privatisation to

interests by value of output

begin without a regulatory framework, with the sale of subsidiaries such as Seat, its telephone directory publisher, and Sirti, the telecoms equipment manufacturer.

objected to a break-up, with Mr Ernesto Pascale, chief executive, arguing that it would delay privatisation "by at least 15 months". And since word of a possible break-up got out at the end of January, they have received powerful support in parliament, largely from the same group which is delaying the regulatory legislation Last Thursday Iri released a terse

statement saying it would continue with the aim of selling Stel as a block. Whether the issue has been shelved is not clear, and much will depend on the way the political cri-sis is resolved.

Iri: the glant stirs

Company report

sbelved, the decision will bave an important bearing on the fate of Finmeccanica, another substantial Iri asset due for privatisation. Iri has a 62 per cent stake in Finmeccanica, a holding company with controlling stakes in Italy's main aerospace, automation, defence, energy and transport companies. Late last year Iri began looking at

the possibility of separating Finmeccanica's defence interests from the rest of its activities. The thesis was the group would be easier to sell without the largely lossmaking defence side. Finmeccanica manage-ment rejects this argument, saying

lossmakers around and a break-up would remove economies of scale. But as long as the industrial conglomerate retains its defence interests (some of which were transferred from Efim), Iri will find it harder to sell its controlling stake. Free-marketeers such as Mr Antonio Martino, former foreign minister in the government led by Mr Silvio Berlpsconi, the media magnate, believe the heads of the big state-controlled companies will do anything to maintain their empires. But it is the rightist National Alliance – which rose under the wing of the Berlusconi government last year ~ that has been the main blocking force. In economic policy, the alliance

remains attached to the corporatist ideas of the Mussolini era. Mr Gianfranco Fini, its leader, has been quick to place his supporters in as many state companies as possible.

This view is shared by many managers, politicians and trade union-ists who are coocerned that the effort to solve Iri's financial problems is at the expense of a coherent industrial policy. There are also fears that asset sales will leave Iri -like Efim before - as a dustbin for lossmaking companies, such as some of the company's defence interests, parts of shipbuilding and ronstruction.

nd the Italian experience of privatisation has not been trouble-free. The Riva group which last year bought Ilva, the Taranto-based steel group, is seeking a L800bn discount on the agreed price of L2,500bn for alleged concealment of environmental and redundancy costs.

But since a successful Stet sale is unlikely to reduce Iri's debt to the level agreed with Brussels, further privatisations will be needed to meet the target. The group is looking at whether it can speed up sales of assets such as its residual 35 per cent holding in the Banca di Roma group and its controlling interest in Autostrade (Italy's motorway concession owner/opera tor). These sales are also politically controversial, and may run into opposition from powerful friends in the Rome establishment who still see the Iri stakes in such businesses as a protective shield against the full force of the market.

Given the importance of Iri to the Italian economy, there is little sense in parliament of the seriousness of the crisis that faces the company. When the issue is raised it is common to hear hopes that Brussels can be persuaded to give some room for manoeuvre. Comfort is taken from the way the French govern-ment has steered the cases of Air France and Credit Lyonnais past the Commission, and the recent approval of state-aided restructor ing for Iberia, the Spanish airline. The 1993 agreement between Italy and the Commission does make provisions for renegotiating Iri's debt level "common agreement" as a result of "market conditions". But the Efim pact was the result of considerable political wrangling and a firm commitment from the Italians to end state aid. Brussels is unlikely to activate the provisions if the gap between Italian promises and Iri's performance is too large. The crisis provoked by the collapse and liquidatioo of Efim was poorly handled and has so far cost the Italian state L18,000bn. It also frightened the financial markets which had to fight to make the treasury stand by Efim's debts. If the politicians bave not learned this lesson the fate of Iri could be even more costly.

mediators appointed UK insolvency, banks, who have yesterday by a French court to more ability than most creditors oversee Eurotunnel's financial and shareholders to influence the

that direction. French and UK insolvency procedures are at either ends of a spectrum in their ranking of interested parties. In the UK, banks stand above most other creditors; under French law, designed to protect the company and its staff, they stand below almost all, including employees. There are respectable reasons

for the French approach. Under

end of its troubles. They have no direct power to force a deal in the acrimonious negotiations between the company and its banks. But their arrival does increase pres-Forms for repayment of the compa-ny's £8bn debts. For its part, Eurotunnel has helped the chances of a deal by offering the banks a partial debt-for-equity swap, in a reversal of its past position. Yesterday's package offers the best chance for many months of a way forward.

among the best protected, while tha least powerful are also the most at risk. From banks' point of view, however, the prospect of the Eurotunnel battle progressing to French courts is understandably horrifying. Behind that lurks a worse nightmare: simultaneous insolvency under French and UK law. The attempt to apply essentially contradictory principles at once would lead the insolvency

company's behaviour, are usually

process into uncharted waters. Those considerations should focus banks' attention on reaching a

In dropping its earlier demand for a complete write-off of a portion of debt, Eurotunnel has realistically recognised that share holders would have to relinquish some of thair assats' remaining value. The banks may be surprised that it is offering this concession at the same time as the appointment of mediators and possible weakening of the banks' position. But the simultaneous proferring of a carrot and bran-dishing of a stick mean that, for the first time in months, the chances of a deal between creditors and shareholders have improved.

portfolio have been sold off in the past four years, raising L18,000bn. But sales have proceeded too slowly, and the company's debt remains at L25,100bn. Interest charges have reduced the prospect of the group returning to profit and eroded further its weak capital base. Losses accumulated since 1993

total more than L12,000bn. To get remotely near its debt tar-get, Iri must sell off its jewel - the 64 per cent stake in Stet, the telecoms group. Stet has been valued by Iri as high as L34,000bn - L7,000 a share. But shares are trading at L4.900, reflecting political uncertainties since the sale has been blocked for 18 months by a crossparty group in parliament opposed to privatisation of the highly profit-

able telecoms group. Senior iri managers are increas ingly concerned that Stet's sale may be impossible if parliament fails to pess legislation setting up the nec-essary telecoms regulatory frame-work soon. They fear that if the sale is not launched by July, it could ba eclipsed in the eyes of international investors by the privatisation of

Stet's senior managers have But if the Stet break-up is it has invested beavily to turn the

Airline ambitions stalled

he difficulties involved in crew in 1994 were paid an average restructuring the industries in Iri's portfolio are well illustrated by the attempts to restore profitability at line.

Alitalia, Italy's national airline. The airline, 90 per cent owned by Iri, lost L197bn (£82m) in the first half of 1995 in spite of hopes of a break-even. Iri's purchase of the Rome airports from Alitalia should put the airline just in profit for the full year. Bot debt has risen to L3,555bn and additional capital is desperately needed.

Mr Robert Schisano was appointed chief executive in February 1994 believing he had political backing to impose a radical shake-up on the airline which was burdened hy years of complacent management and restrictive labour practices with overpaid staff. A survey estimated Alitalia cabin

• O B S E R V E R

\$66,422 (£43,413) sgainst \$30,472 at British Airways and \$51,821 on Iberia, the Spanisb state-owned air-However, Mr Schisago's restruct-

uring led to a damaging guerrilla war with unions over job cuts and changes in working practices. The plan finally stalled when unions objected to a "wet lease" deal with Ansett Airlines that would bave involved the Australian airline supplying aircraft crewed by staff paid at rates below those in Italy.

The then government, made up of non-elected ministers led by Mr Lamberto Dini, was anxious to avoid a showdown since it relied on the support of the leftwing parties close to the unions. Mr Schisapo was sacked in October, allegedly for negotiating a secret pay rise of L28m with the pilots to persuade

them to accept restructuring. Iri wants to make a two-stage L1,500bn capital injection to cover accumulated losses and make new investments. But it says that union agreement to a restructuring plan and a pledge on an 18-mooth labour truce are oceded if the funds

are to be raised on the markets. Without such capital, Alitalia will have to turn to the government for support. But this will again force Iri into confrontation with Brussels, which is determined to end state aid to airlines in the aftermath of the Air France and

Iberia rescue packages. Last week eight of the nine unions involved in the restructuring talks announced they were ready to negotiate again. However, the threat of a stoppage oo February 22 is a reminder of their power to disrapt the process.

South African gold taxation The future of the gold-mining industry and the economic stability of the country are dependent on the opening of new mines; in South Africa the uncertainty in developing new areas is made more uncertain by the State's harsh and discriminatory tax policy. The. Chamber finds it difficult to reconcile the Finance Minister's recognition of the need for foreign investment with the existence of the non-resident shareholders' tax, which deprived overseas investors (mainly British) of £5,650,000 between 1942 and 1945.

Valuing Asia its day have been one of the star exhibits

at a recent art exhibition in Stockholm, billed as promoting communication and co-operation between east and west The trouble started after Kulik

told the Swedisb organisers that he planned to lie naked, chained silently in his dog kennel for 48 hours in a performance "centred around dialogue and communication over national boundaries". He said he would only react "if someone came and provoked him". In fact, as soon as the public entered the hall, Kulik leapt out of his kennel on all fours and threw himself at visitors. pinning them on the floor and biting them. Three were injured before the police were called. Meanwhile, Alexander Brener, one of Kulik's compatriots, elected to give a one-man impression of a

crazed rock concert. He left the public alone but tore to pieces the exhibition's pièce de resistance, a 20-metre tunnel of Swedish and Russian human hair created by Chinese-American artist Wenda Gu as part of "an ongoing worldwide : art project for the 21st century". Horrified exhibition staff were again forced to call the police to restore order and the Russians

have been sent home. A chastened . .

Flowery

Old political clichés die hard. US vice-president Al Gore started his address to the American

Association for the Advancement of Science in Baltimore yesterday bravely enough. He was, be said, in favour of a new political language and new metaphors, based on science, geoetics and computing

One of the more scientifically articulate politicians anywhere, Gore is fed up with the traditional images of political and economic . discourse. "We lean against the crutch of old industrial metaphors which are splintering with age", he

told his audience. Only problem is, the circuits in Gore's brain seem to be very moch hard wired in the old way of thinking, for be was soon mocking his Republican opposents with vintage, industrial-age clichés. Congress, he said, had left the National Science Foundation "sputtering along" with stop-gap financing, and was "extinguishing the creativity of children with a suffocating blanket". The best image he could manage referred to Congress's approach to science which exhibited "the wisdom of a potted plant" - a decidely horticultural metaphor.

Title inflation

There are humble public relations firms and then there is Burson-Marsteller. Observer has just received a press release which describes BM as the "world's leading management consultant in communications and public affairs'.

There are two ways in which Asia matters to Europe. First, it is increasingly the global economy's growth engine; second, Pacific countries are in the frontline in dealing with an ever more powerful China. By engaging with Asia. Europe may help defuse and diffuse the challenge posed by China

home, except possibly by banging the table on human rights. But the leaders should beware forced labour, Chinese orphanages populous region of the world.

that this is the first such meeting automatically gives it an historic significance. Hitherto there has been no direct dialogue between Asia and Europe. The Bangkok summit should fill a missing link. China will be attending. Asia wants such a dialogue in order to involve that country in yet another multilateral natwork before it becomes too powerful. It wants a chance to play a bilater-ally mindad US off against Europe. And it wants to attract more investment and technology from a region that has been grudging hitherto. These are worth while objectives, aven if Euromans tend to look for results of greater immediate substance.

Enropean leaders may be windering why they are bothering to traipse all the way to Bangkok next month for a short summit with thair Asian counterparts. There is only a vague agenda, no immediately discernible shortterm goal, and no obvious way of gaining kndos with voters back to individual Asian countries. Asian leaders are worried that the Europeans may insist on rais-ing questions of labour standards and human rights issues such as

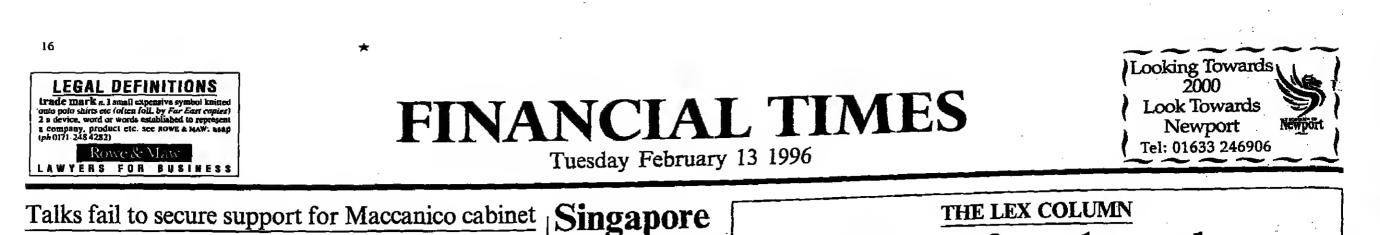

of allowing misunderstandings about Asia's purpose and a clash on human rights to undermine the chance of a closer relationship with the fastest-growing and most

To its Asian promoters, the fact

and Indonesia'a repressive regime in East Timor. While these are legitimata subjects of concern, there is a risk that, if the Europeans push them too far, their Asian interlocators will closa ranks and the chance for mutual economic benefit will be lost. There are some benefits to be gained. Europe wants an agreement to push for further trade reform at December's World Trade Organisation meeting in Singapore, accelerated liberalisation by Asia of service sectors like telecommunications, and better treatment of investment which would include tha development of impartial competition policy in Asian

countries. Impatience risks losing these henefits and a greater ultimate prize: the chance to establish a relationship capable of making the world a richer and safer place.

Olek Kulik, a Russian artist, is back in the dog bouse. He was to

Fini blocks plan to form new Italian government

By Robert Graham in Rome

Mr Antonio Maccanico's prospects of forming Italy's 55th post-war government, pledged to enact significant constitutional reforms, looked increasingly remote last night

Almost two weeks of intense negotiations have failed to find a common position between tha two main alliances, on the centre-left and on the right. They had committed themselves to backing Mr Maccanico, a former Republican party senator and head of the prime minister's

If Mr Maccanico cannot form a government, President Oscar Luigí Scalfaro will be left with two options. He could dissolve parliament or ask Mr Lamberto Dini, the outgoing premier, to head a caretaker government. But there was also talk of Mr

Scalfaro asking Mr Dini to preside over a second government at least until the end of the Italian presidency of the European Union in June.

Parliament would meanwhile form a constituent assembly charged with rewriting the con-

ing the complete truth from us

Mr Henderson explained to the

about this subject".

detailed particulars.

The board of Iri, the Italian state holding company, is due to meet today for the second time in a week to assess its stalled programme of privatisation, delays in which risk provoking a con-frontation with the European

Under an agreement signed in 1993, the government undertook to ensure that Iri's debt was reduced to acceptable levels by the end of 1996. But the plans have been held up in parliament. Paralysed by indecision, Page 15

stitution to introduce a more presidential style of government. Negotiations have only continued due to the desire of the leaders of the two main parties . Mr Massimo D'Alema of the Party of the Democratic Left (PDS) and Mr Silvio Berlusconi of Forza Italia - to avoid early elections. Bnt the main obstacle remained Mr Glanfranco Fini, leader of the National Alliance (AN) and principal ally of Mr Berlusconi in the rightwing alliance. Mr Fini has insisted on his own

brand of constitutional reform involving the introduction of a

Matrix Churchill aided nuclear capability

directly elected head of state with strong powers. The centre-left has strongly opposed such an idea, favouring a form of "semi-presidentialism" - a directly elected head of state but with a chief executive chosen by parliament.

These differences have been compounded by the parties' lack of agreement on the composition of the government. Mr Maccanico had boped to present a list of ministers which reflected the nature of his cross-party support, however, he has failed to sway the main parties. In addition, he has yet to

resolve how to manage daily gov-erument while steering reforms through parliament. The separation of constitu-

tional reform, placing it solely in the hands of parliament has been suggested. However, this has been opposed by Mr Fini. Yesterday Mr D'Alema wrote to Mr Berhisconi inviting him to disassoci-ate himself from Mr Fini or force him to come on board. Through out the crisis Mr Berlusconi has supported Mr Fini.

Power flotation postponed 'for years'

By Philip Coggan in London

The Singapore government yesterday took the surprise decision to postpone for several years the flotation of Singapore Power, which had been expected in the middle of 1996.

Mr Yeo Cheo Tong, minister for trade and industry, said: "First, SP needs more time to complete its reorganisation and to make the translation from a government statutory board to a viable commercial group of com-panies. Second, SP is not earning adequate returns.

earned 7.6 per cent on equity, if commercial standards of accounting were applied. Until last year, the utility, known as the Public Utilities Board, had used World Bank accounting

as soon as possible but I don't see it happening within the next two years at least," the minister said

The electricity and gas operations of the Public Offitties Board were split off to create SP in October last year in a similar move to the Singapore Telecom privatisation in 1993. SP is one of the largest corporations in the city-state with assets worth about SS9hn (\$6.42hn). Last year, Its net profit was \$\$600m

the government had decided instead to sell a second tranche of Singapore Telecom, in which the government retains a stake of nearly 90 per cent. Another theory was that the government was anxious to avoid an embarrassing failure, following the problems its neighbour Indonesia faced in floating Telkom last November. The Indonesian government was forced to halve the value of the offer and slash the price of the shares

pore Power would have made it the second biggest company on the Stock Exchange of Singapore and increased the liquidity of the stock market.

The flotation of Singapore Telecom was largely placed in

The most striking feature of the financial markets in 1995 was the out-FT-SE Eurotrack 200: 1655.6 (+5.1) performance of US equities. Against expectations, the same is true so far this year. In fact, the trend has US and UK equities Indices rebased become more pronounced: having more or less tracked the US market last year, the UK stock market appears to have stalled. True, UK equities have been hit by a spate of profit warnings; but so has the US market. And the two markets are trading on broadly comparable multiples of 1996 earnings 110 -

In fact, the decoupling has been dic-tated not hy stock market valuations but by their respective bond markets. Falling US inflation has given US trea-suries a further lease of life. European bond markets, on the other hand, have been hit by fears that the political imperative of fuelling economic growth may outweigh the need for a tough stance on inflation. Thus the latest round of European interest rate cuts have hindered rather than helped bonds because investors fear they may have to be reversed fairly rapidly. This is particularly true in the UK, where there is concern that the ruling Con-servative government's deficit in the polls, ahead of next year's election, could be influencing economic policy. index-linked gilt yields are now just slightly lower than equity yields, making it difficult for the stock market rally to regain momentum unless the bond market recovers. Looking on the bright side, though, a period of consolidation now will probably make UK equities more resilient when the mevitable turn in the US market eventually comes

Kvaerner

Norway's Kvaerner is paying a heavy price for its failure to acquire Amec, the UK construction business, last year. Despite doubling its pre-tax profits in 1995, the shipbuilding and engineering company saw the price of

Kvaerner's shipbnilding arm accounted for a large chunk of pre-tax profits. This contribution is unlikely to be repeated. Not only is the group's shipbuilding order book falling admittedly from a high level - but the attractive margins achieved in Kvaerner's Finnish yards because of the weakness of the Finnish markka are coming under pressure. This would be less worrying if a rebound in the company's other businesses looked more certain. Bnt Kvaerner's pulp and

taking a more imaginative approach to selling its most valuable asset - its 64 its shares slip 4 per cent yesterday. Investors are right to be sceptical. per cent stake in Stet, the Italian telecoms conglomerate. Iri's current position is that the Stet stake will be sold as it is. The snag is that this is impossible until parliament passes the necessary legislation.

This apparently insoluble problem is an ideal opportunity for Iri to force Stet to break itself up. Such a move would have industrial logic: an entity encompassing fixed and mobile telecoms services as well as telecoms equipment and a hotchpotch of other activities makes no more sense than AT&T's conglomerate structure before

its recent demerger plan. Demerging Stet would also have powerful finan cial logic, as its break-up value is reck oned to be around L34,000bn (\$22bn), compared with its L25,000bn current market capitalisation. In other words, iri's shares would be worth L22,000bn rather than L16,000bn. Given its debt problems, the extra L6,0000bn is not a sum to be sniffed at.

·---,

A further advantage of demerger is that parliament's failure to pass a telecoms bill would be less of a problem. Only the sale of Telecom Italia, the fixed telecoms monopoly which repre-sents about a third of Stet's value, would still be delayed. Selling Stet's other assets, notably the attractive Telecom Italia Mobile, could proceed unhindered.

Amersham International

After two frustrating years for Amersham International, US regula-tory approval for its heart-imaging agent Myoview is a shot in the arm. Myoview is the closest thing the health science group has to the blockhuster drugs of the pharmaceutical industry. The world market for heartimaging - a means of diagnosing heart problems - is worth £250m and the US accounts for more than half of that. Myoview has clear therapeutic advantages over the only serious rival product. Analysts suggest it could contribute sales of £50m (\$77m) and add £10m (or 20 per cent) to profits within two years. It could capture half the heart imaging market.

Myoview's success is critical to Amersham's strategy. The group's focus has moved from low-growth radioactive markers to branded radiopharmaceuticals and it has invested heavily in research. Despite that, the performance of the group's branded healthcare products has been mixed. Brain imaging agent Ceretec is losing sales to a competitor and demand for Metastron, which relieves pain in bone cancer, has flattened out. Meanwhile the group's traditional business is suffering from consolidation among its drug company customers.

That has taken its toll on the shares, Over the past two years, Amersham has underperformed the market by nearly 30 per cent and lost most of its premium rating. With the long-term attractions undiminished. good sales data from Myoview in the next six months would provide a huy signal.

FT WEATHER GUIDE

Europe today

An active low pressure system over Germany will cause unsettled conditions throughout north-western Europe. In the wake of the low, numerous showers will affect the Benelux and France. The Pyrenees and the western Alps will have snow. Northern Germany will have a lot of rain. There will be sleet and snow north of an arc from Hungary across Poland towards Denmark, Ireland and the British Isles should be mainly fair and bright but parts of Scotland will have snow showers and rain is expected along the east coast of England. The Iberian peninsula will be cloudy and there will be rain in northern Spain and in Portugal, Italy and Greece will have showers and torrential rain is expected in southern Turkey and the southern Balkans. Russla will be wintry and there will be light snow in the Ukraine.

Five-day forecast

slowly move south during the next couple of days. As a result, the British Isles will be settled and dry. A northerly flow accompanied by showers will develop across am Europe. Fresh snow is expected in the Alos.

German groups' TV talks break down

By Judy Dempsey in Berlin

Plans to launch a standard decoding box for Germany's pay-per-view digital televi-sion were thrown into disarray yesterday after the country's two large media groups

failed to agree on the technology. The breakdown of talks between Bertelsmann, Germany's biggest largest media conglomerate, and the Kirch group, the television company and film distributor, could spark a bitter struggle between the two rivals for dominance in digital televi-

have been lost.

It also means that Germany could be faced with two competing digital televi-sion networks which would split the market, while the chance to join forces to compete with the eventual entry of non-European television companies might

Threat of clash between rival systems as Kirch and Bertelsmann fail to agree digital format The ettempts to cement an alliance col-

A religious rule change could bring \$60bn into new equity investment vehicles

lapsed during a meeting in Cologne where Kirch failed to sign a memorandum of understanding tying it to the Multimedia Betriebsgesellschaft (MMBG) and giving the green light for a uniform decoding box. MMBG is a consortium headed by Bertelsmann, Deutsche Telekom, the state telecommunications network and Canal Plus, the French commercial television group. It was set up last year to develop e set-top box to decode television signals which would allow access to interactive TV services ranging from video-on-demand to banking and home shopping.

resources," a consortium member said. "Kirch has the product and we have the

network and technology. But Kirch just kept placing obstacles in the way." Kirch said it had not been ready to sign

because of outstanding issues. "We have questions about the technology, about the licensing, and whether MMBG would in fact be ready to launch the system later this year," it said.

Since last year, Kirch had been developing its own decoding box in competition to MMBG's. It was persuaded to join MMBG in December and jointly develop a stan-dard box. It also agreed in principla to "We have lost a real chance for pooling take a 9 per cent stake in MMBG, joining

shareholders which includa Vebacom, the telecoms division of Veba, Germany's industrial conglomerate, ARD and ZDF, the two state television networks and RTL, the German commercial TV channel. MMBG said yesterday Kirch could still take e stake if it changed its mind.

Since December talks floundered, fuelling speculation that Kirch had been still interested in marketing its own decoding system and digital television. Kirch officials yesterday would not comment on that possibility. "If Rirch wants war, then so be it," a

consortium member said, "We wanted the German media and television groups to be under one umbrella. Yesterday's unfortu-nate decision will not, however, deter MMBG. It will go ahead and have 150,000 decoders ready by the summer regardless of what Kirch decides."

group in Argentine water row By David Pilling in Buenos Alree

Compagnie Générale des Eaux, the French water company, may have its concession to run a pro-vincial Argentine water distribution system revoked this week after allegations that it has been supplying homes with contami-nated drinking water.

Aguas del Aconquija, a consortium formed by Générale des Eaux and several local compa-nies, won a 30-year concession in July to run the water and sewerage system of Tucumán. in north-west Argenting. This week, Tucumán's provincial leg-islature is expected to accept a recommendation of government officials by voting to rescind the contract, which would probably be re-offered for tender this year Générale des Eaux, the techni-cal operator, has been strongly criticised by local officials, who have accused it of non-compliance with contractual obligations and of supplying sub-standard water.

"I hava samples of water, which if yon saw you would not believe," Mr Franco Devolio of Tucumán's water and sewerage regulatory body said yesterday. "The water is muddy, the same colour as cola. If it came out of the tap like that in Europe, there would probably be a revolution." Officials last month caused

panic by warning that drinking contaminated water could cause cholera, typhoid and hepatitis. Générale des Eaux, which refused to comment yesterday,

has strongly denied the allegations. It has admitted that water has a high sedimentary content, but says this in no way endangers public health.

The incident is likely to prove embarrassing to the French company, which is also part of the Aguas Argentinas consortium which runs the Buenos Aires water system. Générale des Eaux

Wal-Mart to launch online shopping in Microsoft link

By Louise Kehoe in San Francisco and Neil Buckley in London

Wal-Mart, the world's largest retailer, plans to launch into online shopping, with an electronic store on the Internet using software under development by Microsoft, the US software industry leader.

.

Wal-Mart Online, allowing shoppers to browse through the US group's product range and place orders online, is expected to be launched by late Spring. "We are hoping to lead the

pack in electronic retailing, and lead on price, just as we do in our stores," Wal-Mart said yesterday. Although there are several hundred shopping "malls" and sites on the Internet, their turn-

over remains small, estimated at less than \$300m last year, compared with the \$57bn sales through traditional mail order catalogues in the US alone.

But analysts believe the entry into the markat of Wal-Mart could accelerate the growth of online shopping - already forecast to grow to several billion dollars a year by 2000.

Wal-Mart's choice of Internet shopping software represents a coup for Microsoft, which is mounting an assault on the Inter- any store on the Internet. net software market, dominated by Netscape Communications.

ΰ.

and the second s

Microsoft expected electronic retailing to be a high growth opportunity for both traditional retailers and technology suppliers, said Mr Bill Gates, chairman. "Our goal is to provide the using Netscape's software.

[software] tools necessary to easily create and manage an online store so that merchants can focus on merchandising, branding and differentiation of their products and services in a cost-effective

way," he added. Microsoft was also developing a shopping program for personal computers that would be incorporated in a future version of its Windows operating system. It would provide consumers with a standard approach to shopping at

Its products will compete with Netscape's "merchant system" software, already used by several big retailers and online service providers. MCI. British Telecommunications, Faderal Express and Shell Oil sell via the Internet

Strong last term keeps Saab Auto in black for year

By Christopher Brown-Humes in Stockholm

Saab Antomobile, the of losses. struggling Swedish carmaker managed and half-owned by General Motors of the US, yesterday surprised markets with a strong return to profit in the final quarter of 1995.

The racovery overcame losses at the nine-month stage and enabled the group to post a full-year profit of SKr148m (\$21m), its second successive year in the black. But its fig-

ures failed to build convincingly on its 1994 profit of SKr702m after a five-year run SKr418m

The group needed a betterthan-expected profit of SKr275m in the final three months to return to the black after third-quarter losses of SKr322m dragged it to a ninemonth deficit of SKr127m. The recovery was greeted

with relief, helping shares in It also pointed to tough Investor, the Wallenberg flag-ship which owns 50 per cent of forced it to step up marketing Saab, to rise SKr6 to SKr244 and discount programmes.

EUROPEAN NEWS DIGEST

AssiDomän settles row with Stratton

AssiDomán, the Swedish paper and packaging group, and the Bahamian investment company Stratton have settled their differences over Sepap, the Czech paper group, in which they are the main shareholders. They also said they might co-operate in future investments in the pulp and paper sector

in central and eastern Europe. The reached "a framework agreement governing relations between [them] as coshareholders in Sepap". The agreement between [them] as coshareholders in between Stratton and between [them] as co-snareholders in Sepap . The acceleration also covers the "continuing relationship between Stratton and AssiDoman in the (regional) paper industry". The deal ends months of uncertainty over Sepap's future following a clash between the two shareholders last November. Stratton, which controls 51 per cent of Sepap in alliance with another shareholder, said contracts between the Czech company and AssiDomān, agreed before Stratton acquired control and which were subsequently suspended, would be "reinstated and would continue".

would continue". These include marketing agreements between AssiDomän and Sepap on sales in western Europe that Stratton initially said damaged the Czech company. Mr Daniel Arbess, Stratton chief executive, said the investment company was "now satisfied with the marketing arrangements". Under the

satisfied with the marketing arrangements - onder the framework agreement two AssiDomän representatives will be appointed to Sepap's five-strong board. Stratton secured full control of the management board last year at an acrimonious shareholder meeting that revealed deep differences between the two shareholders over Sepap's relationship with the Swedish company.

Sepap is the largest Czech pulp and paper company and has spent heavily on restructuring its operations over the past few years. AssiDoman bought a stake last summer and now owns 39 per cent, and will be the operating partner at the company. Vincent Boland, Prague

Ufa buys film package

Ufa, the film and television division of Bertelsmann, Germany's largest media group, yesterday bought the distribution rights for a package of films from Phoenix Pictures of the US in an attempt to increase its market share from 2.4 per cent. The price was not disclosed. Ufa bought 300 films, whose titles include Philadelphia and Cliffhanger, and has already sold the rights to Vox, the German private commercial channel and ARD, the state-run television network. Bertelsmann, through Ufa, and Canal Plus, the French commercial television network, each have 24.9 per cent in Vox, while Mr Rupert Murdoch's News Corporation

holds 49.9 per cent. The purchase follows several large film distribution deals made by German television companies over the past few months, the largest being the DML4bn (\$947m) acquisition made last week by the Kirch group for a package of films from Colombia TriStar International Television, a subsidiary of Sony Entertainments. Judy Dempsey, Berlin

Gas Natural surges

Gas Natural, the dominant Spanish gas company partly owned by the Repsol oil concern, reported a 50 per cent jump in net profits to Pta35.8bn (\$289m) last year. But in strictly comparable terms the increase was 22 per cent, following the absorption in 1994 of the formerly state controlled gas supply,

transport and storage company Enagas. The group, in which Repsol holds 45 per cent and the Barcelona-based savings bank La Caixa 25 per cent, started consolidating Enagés results from the second half of 1994. It said earnings last year were also helped by increased demand, especially from industry, and by improved margins. Net sales were 26.5 per cent up for the year at Pta290bn. It boosted its fixed investment outlays by 41 per cent during the year to David White, Madrid-Pta91.5bn.

Luxembourg bank advances

Banque Générale du Luxembourg increased net profit to LFr3bn (\$98m) in 1995, up 11 per cent on the previous ver

One-off gains help Kvaerner double to NKr2.4bn

By Hugh Carnegy in Stockholm

Kvaerner, the Norwegian shipbuilding and engineering group which two months ago failed in a bid to take over the UK constructor Amec, yesterday had the consolation of announcing it had doobled profits from NKr1.2bn in 1994 to NKr2.4bn (\$372m) in 1995.

But the figures were inflated by several one-time gains, and the prospect of a flatter performance this year – particularly in the big shipbuilding division – left investors unimpressed. Kværner abares fell NKr8.50 to close last night at NKr213.50.

The 1995 result was flattered by a gain of NKr568m on the sale of Kvaerner's gas carrier shipping business in April, the unsxpscted write-back of NKr200m previously put aside in reserves at the group's Warnow shipbuilding yard in Ger-many, and a gain of NKr235m

Following the failure in late December of the £360m (\$554.4m) Amec bid - designed to achieve a quantum leap in to NKr7bn, and the order back-Kvaemer's oil and gas and conlog at the year-end was down struction operations - analysts said the results underlined from NKr26.5bn to NKr20.4bn, Mr Jan Magne Heggelund, chief financial officer, said the scepticism abont Kvaerner's prospects. Kvaerner said 1996 profits would be in line with 1995, excloding the shipping drop in orders was partly due to Kyserner having the sale gain The backbone of Kvaerner is business at low margins in what he acknowledged was "s its position as Europe'a largest shipbuilding group, with yards in Finland, Norway, Germany terrible market". He said ship building would return "a good profit" in 1996, but admitted it would be "difficult to match" and the UK. Shipbuilding sales rose from NKr11.2bn to NKr14.2bn in 1995 - accountthe 1995 profit levels.

from the settlement in Kvaer-ner's favour of a dispute over

cost overruns on the delivery

of an offshore platform.

ing for almost half of group turnover, which in turn rose Kvaerner swung to a pre-tax from NKr26.1bn to NKr30.2bn. surplus of NKr276m from a loss of NKr496m in 1994. However, this was boosted by the Pre-tax profits in the ship-building division jumped from NKr1.2bn in 1994 to NKr1.5bn NKr235m gain from the court

settlement. Mr Heggehund said Kvaerner remained committed to its strategy to expand interat a time when other European shipbuilders are wracked by losses. But a large portion of the increase was accounted for by the write-back of reserves at nationally, reducing its dependence on the Norwegian North Warnow. In the meantime, the Sea sector, despite the failed order intake in 1995 fell sharply from NKr15bn in 1994 Amec bid. The group is on the look-out

for further acquisition targets. It still holds a 26 per cent stake in Amec. Mr Heggehund said no decision had yet been taken on whether to hold on to the stake - which cost Kvaerner £50m – or dispose of it.

Kvaerner's two other main strength not to have to take dívisions returned weak results in 1995. Mechanical engineering slipped to a pre-tax profit of NKr2m, from a profit of NKr38m in 1994, while pulp and paper lurched into the red, returning a loss of In the oil and gas division, NKr178m compared with a

Meanwhile, EVC, Europe's largest manufacturer of PVC, has warned that trading condi- tions have been worse than expected, leading some analysts to suspect that it made losses in the fourth quarter. "It is no secret that the sec- chemical industry," said one analyst. "But December appears to have been terrible." In the UK, profit warnings have triggered downgrades	The group, one of Luxembourg's biggest banks, said an overall improvement in its balance sheet stemmed from an increase in deposits from resident and non-resident customers. At the end of last year customer funds totalled LFr591.6bn, up 9.3 per cent on the previous year. Total assets were LFr899bn, up 13.4 per cent compared with 1994. Consolidated results showed a 17.7 per cent improvement in gross income which rose to LFr17bn. Net interest income rose despite pressure on interest margins but the bank said a fall in interest rates led to a strong rise in profits from financial transactions. Emma Tucker, Brussels Sogefi, the Italian car components company, increased net consolidated profits in 1995 to L34.1bn (\$21.7m), against L27.1bn in 1994. Turnover at the company, 57 per cent owned by Cir, one of the De Benedetti family's two Italian holding companies, rose 13.6 per cent to L913.2bn. John Simkins, Milan.

renewed takeover activity the former because its share value is depressed; the latter because it is undergoing further privatisation (the governtaria.

ment will reduce its stake from 50 per cent to 25 per cent in next month's offering). The highly capitalised Popular group, the smallest of the big banks, has the funds to be a potential buyer. The bank bas reised its provisions, despite its bealthy balance sheet, and declared a 1995 profit rise of just 5 per cent to

Pta57.4bn. But Popular said it was concerned about tightened margins and could seek to widen its asset base through an acquisition. Some analysts believe Popu-lar has BCH in its sights, but Popular's Mr Valls said

recently that any takeover would be the result of a "transparent and agreed bid" and that BCH was "not talking". Another potential buyer is BBV, whose chairman, Mr Yharra, is believed to favour tander.

purchasing Argentaria stock. Pressed by London analysts last week, bowever, Mr Ybarra denied any move on Argen-

Mr Luzón, Argentaria's chairman, has insisted the partly-privatised institution should remain "independent". Next month's offering of Argentaria stock aims to keep predators at bay by widely distributing the bank's shares among domestic retail investors and foreign institutions.

C antander's Mr Botin has S publicly opposed further mergers and, in particu-lar, a BBV bid for Argentaria. But Mr Botin apparently anticipates that under a Popular Party government there could be a banking shake-up equivalent to that which took place under the Socialist administration. He has warned he will not stand back should rival institutions seek to grow by acquisition and draw level with San-

EUROPEAN NEWS DIGEST Klöckner-Werke posts DM14m loss

Klöckner-Werke, the troubled German automotive and packaging group, yesterday reported gross losses of DM14m (\$9.48m) for the three months ended December 31, but said the results were better than forecast. The group reported a deficit of about DM50m in the corresponding period a year earlier. It recorded a net loss last year of DM210m, which Mr

Heinz-Ludwig Schmitz, the chief executive who took over in December, blamed on falling margins, rising costs for raw materials and provisions for restructuring. Mr Schmitz said the group had lifted sales in the three-month period by 5 per cent to DM1.04bn but new orders were stagnant at DM1.07bn. Klöckner-Werke last year indicated it wanted to write-down its capital, but Mr Schmitz said be would be unable to obtain

the necessary 75 per cent of votes to support the move at the annual meeting in March. A final decision about the write-down would only be taken once the restructuring programme had been completed, which was unlikely to be before the end of this year. "We first have to prove that Klöckner Werke is consistently profitable," Mr Schmitz said. "Only then can we win over our shareholders for such measures." Michael Lindemann, Bonn

Ahold sees strong growth

Ahold, the Dutch supermarket group, expects annual turnover to more than double over the next 10 years to about F160bn (\$1.98bn) through organic growth alone. "I predict that the very large distributors will take steps towards large-scale, cross-border activities, and the regional and national players will come under pressure," said Mr Cees van der Hoeven, the group's president, in an interview with the magazine of the Robeco group of investment funds.

"So we're talking about companies with turnover in the order of upwards of Fl 150bn, Fl 200bn, Fl 250bn." Mr Van der Hoeven said Abold would want to be in that leading group. "Possibly that would imply a mega-merger or a very large acquisition," he added. He said that even without such a "mega-deal", organic growth over the next 10 years or so within the Ahold group would ensure annual turnover of between Fl 60bn and Fl 70bn. In 1995, Ahold posted a 2.1 per cent increase in sales to Fl 29.6bn. Mr Van der Hoeven also reiterated the group's strategy of expanding in east Asia. "We are in discussions with China, Malaysia and Thailand," he Reuter, Amsterdan

Deutsche Telekom software buy

Deutsche Telekom has bought a majority stake in SAP-S, a subsidiary of the SAP software company in order to create new software for telecoms companies. Deutsche Telekom will hold a 50 per cent plus one share stake in the company, which employs about 100 people and had sales last year of DM26m (\$17.6m). SAP has had considerable success with its R/3 management software package – which is used by Microsoft, the US software group – but Deutsche Telekom said there was a growing market for software tailored for telecoms Michael Lindemann

Total upbeat on prospects

Total, the French oil company, expects a "substantial increase in profits from 1995 pre-exceptional profits," said Mr Thierry Desmarest, chairman. Factors driving the improvement would include higher productivity and rationalisation of refining activities, he told Le Figaro, the French newspaper. Total posted 1995 net attributable profit of FFr2.2bn (\$434m), down from FFr3.4bn the previous year. Pre-exceptional profit in 1995 climbed from FFr3.4bn to FFr3.7bn. Reuter, Paris

The performance of the 12 review after strong protests by minority foreign shareholders in BPH and concern from the US treasury. The government's proposal

to transfer its 46.6 per cent stake to Bank Handlowy was particularly controversial. It dismayed BPH's minority investors, who include the Dutch-based ING group and the European Bank for Reconstruction and Development (EBRD), But yesterday's rise in BPH shares was a response to signals from the finance ministry that the fate of the bank is not yet sealed.

Mr Ryszard Pazura, the depnty finance minister, who has been responsible for the banking sector since the beginning of this year, noted last week that the government's consolidation decision had not formally been signed by Mr Jozef Oleksy, the former prime minister. "We are currently study-ing the whole issue and sounding the opinions both of the banks which are to be included in the scheme and of the banks

vate sector if the government's reduction programme. But the

later this month, once enabling legislation has been passed by parliament. But the chances of changes to the consolidation proposals have risen now that Mr Oleksy has been replaced by Mr Cimoszewicz. The new prime minister is not bound by the earlier proposals. Even if the decision to hand over the BPH shares to Bank Handlowy does go ahead "strings would be attached" to ensure governance remained in private hands and that the interests of the minority investors were respected, Mr Pazura added.

Telex-Chile rapped for misreporting

Trading in Telex-Chile, a long-distance carrier, was suspended briefly on Monday in Santiago and New York, after the Chilean securities commission announced it was fining the company for misreporting profit figures in its 1993 and 1994 accounts and requesting new financial accounts for 1995.

The securities commission charged that Telez-Chile had improperly included results from a leaseback operation by a subsidiary in its profit statements, and said the 1993 and 1994 position must be compensated for by taking a loss for the equivalent \$8.9m in the 1995 results.

The company auditors, Price Waterhouse, were also fined. Both they and the company said they would challenge the commission's ruling in the courts. Local brokers were surprised the commission reacted so slowly to the company accounts but thought the ruling would be useful in helping formulate Chile's GAAP accounting principles. This is the second controversy affecting Telex-Chile in less than a year. It was accused by a rival company last year of artificially bolstering its long-distance traffic, though the charge was Imogen Mark Santiago never proved.

Corimon slides into red

Corimon, the Venezuelan paints group, posted a 1995 third-quarter loss of constant value Bs35.835hn (US\$123.7m), after a Bs2.735bn profit for the same period last year. The figures do not consolidate results at its subsidiaries – Standard Brands Paints in the US, Colorin in Argentina and General Paints in Mexico - and come amid efforts by Corimon to restructure \$151m of debt with creditors.

The company blamed the losses on "the difficult situation of its foreign subsidiaries, as well as last December's devaluation of the bolivar", which accounts for 44 per cent of the losses. Sales in the last quarter rose 28 per cent year-on-year to constant value Bs11.97bn Raymond Colitt, Caracas

Ernst & Young in India link-up

Ernst & Young, one of the global Big Six accountancy and financial advice firms, has formed an alliance with Tata Consultancy Services of Bombay to serve multinational clients, TCS has revenues of \$130m and 5,000 professionals in 100 cities. Up to a quarter of its revenue comes from the UK, and it specialises in IT systems development.

Honeywell to buy Duracraft

Honeywell, the US environmental control group, has agreed to buy Duracraft - a maker of household products such as heaters, fans, bumidifiers and air cleaners - for \$283m. Mr Bernard Chiu, chairman and chief executive of Duracraft, has agreed to tender his 31 per cent stake in the company to Honeywell, which has begun a cash tender offer in the market at a price of \$43% for each Duracraft share. Duracraft's shares jumped \$15½ to \$43 on the news. Maggie Urry, New York

Airline chief sacked after loss

Mr Edward Acker, chairman and chief executive of BWIA International of Trinidad, has been sacked after the airline reported a US\$3.6m loss in the year since it was privatised. Mr Acker, a former chief executive of Pan American, Eastern Airlines and Air Florida, all of which are defunct, led a consortium which bought controlling interest in the airline for the Trinidadian government. He has been replaced as chairman by Mr Anthony Jacelon. The loss by the airline was mostly in the last quarter of 1995. Canute James, Kinaston

Rock singer sues record label for \$14m royalties

By Alice Rawsthorn

Meat Loaf, the US rock singer, is suing his record company claiming that it owes him \$14m in unpaid royalties for his bestselling album, Bat Out Of Hell. The singer filed suit against Cleveland Entertainment, a small Ohio-based record label, after similar action by Cleve-land last autumn against Sony Music, which manufactured and distributed the album on its behalf. Meat Loaf's suit comes at a

time when musicians are becoming increasingly aggressive in their dealings with record companies. Stars are demanding more and more lucrative deals to renew their contracts, culminating in last

Inco in quandary over Voisey's Bay bid battle

By Bernard Simon in Toronto

inco. the Canadian group which is the western world's blggest nickel producer, is in uncomfortable position as the battle unfolds for control of a spectacular nickel, copper and cobalt deposit at Voisey's Bay, Labrador.

inco's quandary is reflected in its share price, which has dropped sharply since its arch-rival, Falconbridge, launched a friendly C\$4bn (US\$2.92bn) bid last Friday for Diamond Fields Resources, the small Vancouver company that owns 75 per cent of the Voisey's Bay deposit. Inco shares fell to C\$45.88 in

early trading in Toronto yesterday. C\$3.38 below their level before the Falconbridge bid.

Most analysts expect Inco to to 8 per cent of world consumpstep forward with a counter-offer for Diamond Fields in the next few days. Mr Manford Mallory, analyst at Research Capital in Toronto, said yesterday: "There's no question that Inco would like to own [Voisey's Bay], but the question is how and at what price." Inco bought a 7 per cent

proxy statement, in which bonuses are

detailed, earlier than most investment

stake in Diamond Fields as well as a 25 per cent direct interest in the deposit last year. It also gained a right to market the mine's entire nickel and cobalt output for the first five years after it comes on stream around 2000. Voisey's Bay is expected to

be one of the world's biggest and lowest-cost nickel mines. Production was initially estimated at 133 fbs a year, equal

tion. But further discoveries have suggested that the figure could at least double.

Inco was in the throes of negotiating a deal with Diamond Fields, when Falconbridge approached Mr Robert Friedland, Diamond Fields' chairman, four weeks ago. According to a source close to Inco, "they thought the whole thing was done"

Mr Frank Pickard, Falconbridge's chief executive, said yesterday that Mr Friedland told him "his beart was with Falconbridge, but his head and his wallet were with Inco. 1 guess his beart won". At least two other companies

- RTZ, the UK-based group, and Minorco, the international arm of South Africa's Anglo

American - have also been in talks recently with Diamond Fields. BHP, Australia's biggest company, has also been mentioned as a possible counter-bidder, but analysts suggest all three companies prefer not to become embroiled in bid battles. Also, both BHP and RTZ are still digesting recent big mergers – BHP with Magma Copper of the US and RTZ with CRA of Australia.

Expectations of a rival bld were reflected in Diamond Field's shares, which gained C\$1.50 to C\$38 in early trading yesterday. Falconbridge's offer, which comprises a maximum of 15 per cent cash, is valued at about C\$36.30 a share.

Mr Tony Hayes, analyst at Credifinance Securities in US\$105m Toronto, predicted that "unless

there's a really silly bid, Inco is going to win it." Mr Hayes estimated that inco, thanks to its existing holdings, could offer up to C\$45.37 a share, and still end up paying less for Voisey Bay than Falconbridge. However, other analysts cau-

tioned that Inco, which is widely owned, could face shareholder opposition. "There sector, would be a lot of dilution of earnings for the next few years," Mr Mallory said. Inco is in the middle of a costly share buy-back plan pnt in place last year under pressure from shareholders. The

company agreed to buy back 10m common shares by July 1996. Abont one-third of the purchases had been completed last December at a cost of

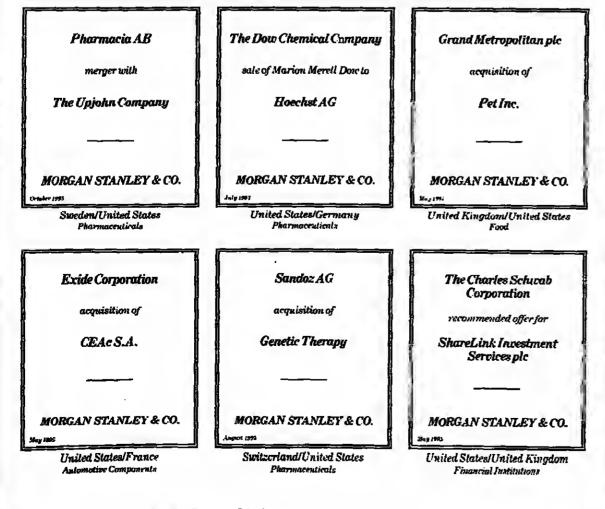

Morgan Stanley doubles directors' bonuses The bonuses reflect a sharp recovery in profits in 1995 after a poor year in 1994. They are higher than many had Mr Fisher's bonus of \$4.19m was still short of his 1993 bonus of \$4.44m, but expected and may set the tone for the industry. Morgan Stanley has a November financial year-end and files its

above the \$2.06m he received in 1994. His salary was \$477.329 in 1995, which was a 10-month financial year, down from \$575,000 in 1994. Mr Fisher was also awarded \$2.07m in restricted stock. In 1994 he received no restricted stock,

banks. Lehman Brothers, which also hut in 1993 was awarded \$5.63m. Adding all three together, Mr Fisher has a November year-end, is due to file its statement with the Securities and received over \$10.5m in 1993, and a Exchange Commission later this month. lesser \$6.74hn in 1995.

Japanese electrical industry fast-moving Japanese company that is the

neglected the mini business. But now the larger and more diversified manufacturers are forcing us into a corner," says Mr Hajime Unoki, Aiwa chief executive.

Sales growth in the year to next March has slowed dramat. ically, according to forecasts by industry analysts in Tokyo, to 7.5 per cent from last year's 35 per cent growth. Last year Aiwa made a Y10bn (\$93m) recurring profit - before tax and extraordinary items - on turnover of Y241.9bn. Operating profit margins started to fall last year, for the first time in three years, from 6.5 per cent of sales to 6.1 per cent. Mr Unoki expects "revennes will be stable or a bit better"

The other protagonists are the leading Japanese, South Korean and Chinese consumer next year, on the assumption that prices will continue their current 10 to 15 per cent rate of decline on an increase in volumes of the same order. He is at the same time resigned to seeing his market share slip from the current 35-30 per cent in Japan and 40

electronics market Until a few years ago, other per cent in the US, to a world electronics companies

"If we can maintain a market share at that level in any important market, that would

be good," says Mr Unoki. All this is a salutary change from three years ago, when Aiwa was justly able to boast that it could avoid price wars because of its pursuit of what was then a niche market of no interest to the large, diversified consumer electronics companies. It recorded strong sales

recession since the 1930s. But now Aiwa and its Japanese and Asian competitors are faced with the problem of achleving growth in a mature, and suddenly very price sensitive,

the company round. Mr Unoki asked for volun-

tary redundancies, shifted production overseas and focused on Aiwa's strongest single product, mini systems. The strategy remains valid,

14%

insists Mr Uooki. Aiwa plans to defend its position as market leader in the hope that one of the diversified producers

out. It has, after all, pinned its survival on its current strategy: the group nearly collapsed 10 years ago, burdened by the costs of making too many products for its size. Aiwa's 50.6 per cent owner, Sony, sent in Mr Unoki, then the parent's director of overseas sales, to turn

throughout Japan's worst

industry. Aiwa, for one, will slug it going even harder.

COMPANY NEWS: UK

Appointment by French court marks the end of a long road of persuasion for company and bankers

Eurotunnel mediators to help resolve crisis

By Geoff Dyer and **Villiam Lewis**

22

The appointment yesterday by a French court of a mediator to help resolve Eurotunnel's financial crisis marks the end of a long road of persuasion for company executives and bankers.

"When I first heard about it," said one company executive. "I thought that the Idea was barking mad. It sounded like the first stage towards receiver-

These worries were abared by non-French bankers unfamiliar with a process unique to French commercial law. The involvement of a French court seemed to raise the prospect of insolvency procedures and pos-sible legal action by irate French shareholders.

Tensions increased when it was revealed that the group's auditors had initiated the pro-

cess by writing to the commercial court, warning that Eurotunnel was in danger of becoming technically insolvent. It followed the company's announcement in September that it bad suspended interest payments on £8bn of debts.

However, both Eurotunnel directors, and even some of its 225 banks, now claim to be relaxed about the appointment. Eurotunnel described it yesterday in a statement to shareholders, as a "good offices mis-sion". The mediators were there to assist the company resolve its problems, it said. Eurotunnel's two co-chairmen. Sir Alastair Morton and Mr Patrick Ponsolle, have held a number of meetings with the-

president of the French commercial court in recent months, belping to convince both of them that the appointment provided a positive way

TODY ADDRENS

Lord Wakeham: his jeb as one of the mediators will be to force more realism into negotiations

their rights. Lawyers told the banks that it was an "informal procedure" used to belp companies sort out difficulties with creditors. The appointment did

"not require immediate action" on the part of the banks. There are, however, enough dissenters amongst the lenders

to cause concern at Eurotunnel "We have been looking at this very carefully and it is

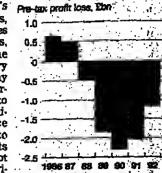

extremely angst-making," one banker said. Although the process is technically the first stage of pre-insolvency proceedings under French law, both sides are agreed that there is little danger, at this stage, of the company being declared bankrupt.

Eurotunnel bopes that the appointment of a mediator will accelerate its flagging negotia-tions with the banks. Although the precise role of the mediators is still unclear, it seems that the job of Lord Wakeham and Mr Robert Bad-

inter will be to force people to take more realistic positions in the negotiations.

Slowly and painfully, Lloyd's Lloyd's of London is crawling towards a resolution of its problems. Lloyd's

needs to find £14bn of assets, to match the past liabilities to be taken on by Equitas, the vehicle central to the insurance market's recovery plan. This is one reason why -0.5 it needs Names to co-operate: Lloyd'a wants them to contribute £3.9bn of Equitas's assets. In fact, since only £600m is expected to -2.0 come from fresb payments from Names, this should not be too difficult: even a serious shortfall on the £600m is Source: Lloyd's unlikely to make or break

the creation of a £14bn company, What Names really have to offer, in return for a limit to their llabilities and an exit from the market, is not fresh money but an end to their legal claims. The more litigation is outstanding, the more difficult it will be for the market's past liabilities to be ring-fenced. And without a credible ring-fence. Lloyds' future would be bleak. For this reason, Lloyd's deci-sion to target 75 per cent of its £2.8bn settlement offer to litigating Names is sensible.

Nonetheless, the plan announced yesterday will do little to end the poker game between Lloyd's and its Names. When the crunch finally comes, most Names will recognise that they would harm their own interests by letting the Equitas plan fail. But they will not sign up until they are convinced that the crunch has come. So far, Lloyds has not played its hand cleverly. By encouraging Names to believe it could offer more than £2.8bn, it has given itself little choice but to do so.

An informal role with no formal powers alongside the debtor-creditor conciliimpose any settlement on the parties Their role is informal and although against their wishes. And although ation procedure or "reglement amia-

Because the mandataire procedure is confidential there are no official figures as to the success or failure rate.

FDA verdicts mark policy shift

By Jenny Luesby in London and Richard Waters In New York

Amersbam International, the health sciences group, yester-day won approval from the US Food and Drug Administration for Myoview, Its beart imaging

drug. The company's shares rose 15p to close at 850p following the decision by the FDA, which also cleared over-the-counter sales for both Nicorette, a nicotine-spiked chewing gum made by Smithkline Beecham, and Rogaine, the best-known brand in the treatment of bair loss.

The products are the latest in a growing line of treatments

to make the switch from prescription-only to consumer product status, signalling a drive by pharmaceutical companies to offset the loss of patents.

needed prescriptions.

Amersham, meanwhile, imaging was worth about £250m annually, of which £140m is accounted for by the

> Rogaine, manufactured by Upjohn (now part of Pharmacia Upjohn), won approval from the FDA after being rejected 19 months ago. Regulators had withheld their approval out of concern that the drug is not sufficiently effective. The flurry of approvals for

new over-the-counter drugs highlights the greater political pressure on the FDA in a Republican-dominated Wash-ington where the agency has become a focus for complaints about what is perceived as unneccessary regulation.

Alcan reforms UK operations

By Kenneth Gooding, ining Correspondent

Britisb Aluminium, a new company that emerged fully fledged yesterday with annual sales of about £500m (\$770m) profits of £25m and 4,200 employees, is to be floated as soon as possible, according to Mr Ian McKinnon, the chief

executive. The company was formed from the downstream operations of Alcan of Canada's UK subsidiary - the sale of which was completed yesterday for about £200m.

Mr McKinnon, made a for-tune when be and five colleagues bought and sold Leyland Bus in the 1980s. Now he is chief executive of British

The remaining 85 per cent will be shared equally between institutional investment funds managed by Mercury Develop-ment Capital, CVC Capital Partners and Morgan Grenfell Development Capital. They have raised £265m for the deal, which leaves Mr McKinnon's

team scope for investment. He said be hoped British Aluminium would be floated in three to five years. The new management would bring a more entrepreneurial and fastmoving style to the operations. The sale is part of a sweep-

ing restructuring which Alcan began late in 1993 with the aim of creating a "simpler, more focused company with strong market positions." Mr Jacques Bougie, president, said recently

DIGEST

Shares in Butte Mining lost 30 per cent of their market value yesterday, falling by %p to 1%p, after a US appeal court ruled that the company could not pursue its action against former managers and promoters in US courts.

The litigation has been Butte's main activity for eight years and it was suing for up to \$1bn.

The court did not comment on the merits of Butte's case but said it did not have jurisdiction because "the alleged fraud and losses occurred when securities transactions were consummated in the UK"

Mr David Lloyd-Jacob. Butte's chairman, said his company would now be forced to litigate fully in the UK where, unlike the US, it might have costs awarded against it if it lost. He recalled that Butte already bad filed, by way of counterclaim, an action against certain subsidiaries of Simon Engineering, seeking damages of £100m plus interest.

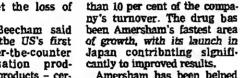

Simon responded by emphasising it was not not a party to any UK proceedings, although it is attempting to recover £200,000 costs from Butte. The Butte action was against the Robertson Group and two of its subsidiaries which it acquired after the events cited in Butte's counterclaim. Simon pointed out that in his 1995 annual report, Mr Lloyd-Jacob had con-ceded "it is unlikely that Robertson has sufficient resources to meet the full amount".

Mr Lloyd-Jacob also recalled that Butte had filed another counterclaim for £100m, in an action from which Ernst & the accountancy firm, was attempting to withdraw. "Butte is reviewing the situation concerning the other defendants in the action originally filed in Montana," be added. Kenneth Gooding

expects annual sales of Myov-iew to exceed £45m by 1999, when it could account for more SmithKline Beecham said Nicorette was the US's first regulated over-the-counter smoking cessation product.Some other products - certain nicotine patches, for instance - fall outside the FDA's purview and have never

EUROTUNNEL SHAREHOLDERS

12 February 1996

Dear Eurotunnel Shareholder.

Last September, we promised we would report to you about the end of January on our progress towards a durable sharing of the "pain" of Eurotunnel's situation between shareholders, banks and other relevant parties.

Eurotunnel has made a lot of progress in 1995, its start-up year. After initial difficulties experienced with the reliability of equipment delivered to Eurorunnel by the contractors, the quality, frequency and punctuality of Le Shuttle services improved steadily throughout the year, as customer surveys confirmed.

Our revenues rose from little over £40 million in the first quarter of 1995 to just over £110 million in the fourth quarter. We are confident that 1996 revenues will be at least 50% above revenues we are reporting for 1995 (almost £300 million). Since summer 1995, our cashflow has covered not only all cash operating costs, but also our disciplined further capital investment in our system and the payment of interest on the 5% of our debts (£415 million) that has senior status and is not in standstill, During the current junior interest standstill, we are therefore cash flow positive, with no need for further borrowing.

We blan to build on our initial achievements. The Joint Board last Friday approved a programme designed to optimise all aspects of the company's business. The benefit of lessons learned from customers and experience of the first 18 months of operation are expected to show this year.

Four external sources are working to postpone our return to normality - defined as being able to service our debt when due and to plan the distribution of dividends. They are - the battle between the ferry operators on the Dover Straits; the faltering start of rail services through the Tunnel by the national railways; the high margins on our bank debt; and the continuing inability or tardiness of the UK and French Governments to deliver without reserve their promises not to permit Eurotunnel to be disadvantaged nor burdened with undue cost by their fiscal or regulatory policies and practices. The two Governments above all have to recognise that their promises in the Concession, implicit and explicit, were promises to banks and investors worldwide upon which billions were advanced and invested. At the end of the Concession the two States will receive without cost the benefit of the billions invested. In addition, we are pressing our claim against the project contractors. TML, seeking compensation for the inadequacies of the equipment they delivered to us.

Discussions to date between Euronanel and the representatives of the 225 syndicate banks have made some progress in defining the issues and common objectives. We have yet to agree any equitable sharing of cash flow or pain. Any accord will have to receive the unanimous approval of the syndicate and be approved by an appropriate majority of our shareholders. This will take time. Meanwhile, in defence of your interests, your Board;

· bas opposed any proposal in which the payment of interest and repayment of principal might well absorb the company's whole cash flow to the end of the Concession;

· believes that it is necessary to above all to reduce both the debt outstanding and the interest accruing thereon, while fixing its rate over a long term, allowing a return to a stable financial situation within a "reasonable horizon":

• is determined that shareholders retain the largest possible stake of the eventual value of the equity, recognising that a part thereof may have to be conceded to lenders in return for later and lower remuneration and repayment of their loans.

To enhance the chances of reaching agreement, we have decided, with the unanimous agreement of the Joint Board, to take the initiative in invoking the positive assistance available to us from the French legal system. Wholly unlike the British system the French system seeks to encourage friendly resolution. We have requested the Président of the Tribunal de Commerce in Paris 10 nominate two "mandataires ad hoc". Their role, best described as "good offices", is to assist the company in seeking a resolution of its difficulties. However, the Board and the management continue to be fully responsible for the conduct of the company's "Business as Usual". In response, after careful consultation with us, the Président of the Tribunal de Commerce has nominated

- Lord Wakeham, Chairman of the Press Complaints Commission and former Cabinet Minister, and

. Mr Robert Badinter, former President of the Constitutional Council of France and former Minister of Justice. They have accepted the mandate to the satisfaction of both the British and French directors of Eurotuonel. Their role is informal, but under the authority of the Court,

Our duty is mour shareholders. We believe it is possible to preserve for our shareholders a very substantial interest in the eventual equity value of the Channel Tunnel Concession, subject to our making safe progress through the next six to ten years and subject particularly to the two Governments recognising the obligations still upon them. After a slow and painful start your company is on its way towards realising its potential. We shall report further in our Annual Report, due to be issued to you in early May and at the Annual General meetings of shareholders in June.

Norwich Union stays silent on Farnell vote

By William Lewis

Norwich Union, which owns about 3% per cent of Farnell Electronics, said yesterday that it had decided not to disclose whether it had voted for or against the company's pro-posed £1.8bn takeover of Premier industrial Corporation. "There is no mileage for us in making it public," Norwich Union said. The investment institution said it had told Farnell, how it planned to vote at Thursday's extraordinary general meeting, but "in a democracy you have a right not to

declare bow you vote". Norwich Union's refusal to state bow it will be voting follows the disclosure by two other institutional sbare-holders that they will be voting against the proposed deal. Prudential Corporation,

Fyffes makes Italian fresh produce buy

Peviani, which has net assets of IC5.3m, made pre-tax profits of IC3m in 1994 on sales of 1580m. The deal is Fyffes ninth acquisition since July 1994.

GKN expands in Asia

GKN, the engineering group, is expanding its presence in the fast-growing Asian car market through a joint venture with Hanwha of Korea.

GKN Automotive, one of its car components subsidiaries. will invest more than £10m in a 49 per cent stake in a new company which will make constant velocity joints and driveshafts - GKN specialities - for the fast-expanding Korean motor industry.

Initial supplies from the plant, which will have a planned capacity of 500,000 car-sets a year. will go to the new Samsung factory near Pusan. However, GKN hopes to extend its sales to other Korean manufacturers.

The Korean motor industry has been growing exponentially on the back of buoyant export sales and strong government encouragement. Total car production grew by almost 12 per cent to 2.53m units last year. The Korean deal, which follows other transactions in China,

Malaysia and India, is GKN's 13th automotive joint venture, and its fourth in the booming Asian market, where the company says it wants to expand further. GKN shares rose 12p to 827p.

Whitecroft in £7m investment

Whitecroft, the Cheshire-based industrial conglomerate, is to invest £7m at its Edward Hall subsidiary.

The move is designed to keep Edward Hall'a place as the leading supplier of medical cotton fibre for what is technically known as the non-woven and feminine bygiene market, the principal products of which are tampons.

The tampon market has been growing steadily since the end of the cold war opened former Soviet bloc countries to western toiletries and personal hygiene products.

Edward Hall is the European market leader, exporting 75 per cent of its output to more than 40 countries. It claims to supply more than half Europe's annual medical cotton fibre market of about 27,000 tonnes.

Part of the new investment is in bleaching and ancillary equipment that will use hydrogen peroxide – the most envi-ronmentally friendly technology available. This will complement company's unique continuous bleaching plant which it installed seven years ago.

Whitecroft also plans to open a technical and development centre to improve testing and look for new markets for surgical, cosmetic and healthcare applications for cotton. Mr Mike Derbyshire, Whitecroft's chief executive, said yes

terday. 'One of the key issues in this sector is how to work jointly with some of the world's largest healthcare companies to develop new products which are cotton-based.

"We also have to try and continuously raise quality at existing prices. Most of our competitors are small and privately-owned and will not have the resources to match this invest-

The new equipment will be operational from the middle of next year, the company said.

Agua Rica copper-gold deposit promises to be Argentina's biggest

By David Pilling in Buenos Aires

Argentina's Agua Rice copper-gold deposit is shaping up to be even bigger than that of nearby Bajo de la Alum-brera; which last year wes declared the country's largestever mining project.

Agua <u>Rica</u>, 70 per cent owned by BHP Minerals of Australia, has an "indicated geological resource" of 1.2bn tonnes, according to Canada's Northern Orion, which owns the other 30 per cent.

The deposit, in Catamarca province in nnrth-western Argentina, contains 13.5bn pounds of copper, 9.5m ounces of gold and 846m pounds of molybdenum, the company said last week. Northern Orion is 54.8 per cent owned by Vancouver based gold producer

MARKET REPORT

Aluminium

M r Douguas in the UK minister of agri-culture, delivered r Douglas Hogg, the UK minister of agrisome tough messages at last week's annual meeting of the National Farmers' Union. He "This would make 1996 a prefaced his remarks by pointsimilar year to last year, when we had the good news ebout ing out that UK farm incomes had increased during the past Bajo de la Alumbrera," said Mr four years by more than those Fillol Casas. "That is extraordifor most other sectors of the nary. . . It will mean a total of economy and went on to to say sibn in mining investments in that British farmers must now become competitive in world Argentina within the next five terms and had better get used to the idea of running their businessas "without perma-Argentina, which has very

little mining tradition, has recently changed its mining nent production subsidies". de to make it more attractive Figures published by the ministry of agriculture a few days ago show that everage farm incomes during 1995 are estimated to have risen by 29 per cent in real terms. The reasons for such an increase were

threefold: favourable weather. high world prices for some commodities and beeic so-called "agrimonetary devel-opments" as further devaluation of sterling increased the value of payments from the European Union for such **Polish stretch of Russia-Germany** things as compensation for set-ting land aside. Chief beneficia-

ries of the increase were arable

farmers, who did very well indeed last year. In contrast, some intensive livestock farmers had another

By David Richardson

their arable farming neighbours - cereals which they had to buy to feed to their livestock

The ministry figures spelt out clearly the contrast in their fortunes. Using an index of 100 for the average net farm income over all farming sectors during the three years from 1988 to 1992, that for cereal growers had, by 1995, increased to 245 in real terms. The comparable figure for pigs and poultry was 50 in 1995 having been 44 in 1994 and 22 in 1993. Neither pigs nor poultry receive significant aid from either the UK government or the EU. They alreedy exist without permanent production subsidies". Clearly these inter-dependent sectors of farming are badly out of balance; and the

trated on fewer, bigger, special-

Subsidy cuts threaten agricultural unity

Reliance on real markets will mean every farmer becoming his neighbour's competitor

ing to ministry calculations there were in the UK 13,000 pig farms and 39,900 poultry farms in 1989. By 1994 the number of farms with pigs had declined to 11,400 and those with poultry to 30,000. In both cases, most of the casualties were smaller farmers as production inevitably became further concen-

ist holdings. Two years of serious losses on pigs eventually led to a reduction in production across Europe. This caused a shortage of nig meat and for the past few months prices have risen end reasonable profits have returned, in spite of continuing high feed costs. Poultry producers beve seen no such see an even more disastrous improvement in their fortunes, downturn. Poultry has its own cycle, which tends to change bowever, and many are still even faster. suffering losses. None of this is new, of

Such cyclical pressures have, in the absence of stabilising subsidies, course. But the cyclical nature of these sectors has intensified as farmers have tended to specialise in producing far fewer characterised pig and poultry production for years. Indeed, commodities. When I was a they have been instrumental in boy most would run e berd of forcing farmers to seek ways to dairy cows, fatten a few beef optimise efficiency (or in Mr animals, keep a few hens and Hogg's words, "to become compigs, and grow a wide range of crops. Today that has been petitive in world terms") and to adopt systems that do not proved to be uneconomic. Spealways meet with universal cialisation is seen as the way approval. Moreover, within the to better profits and most farmnext three years. INTERNATIONAL CAPITAL MARKETS

US Treasuries firmer in wake of quarterly refunding

By Maggie Urry in New York and Martin Brice in London

. . . .

......

US Treasury bonds were firmer yesterday in subdued trading in the wake of last week's record quarterly refunding. The lack of economic news, the closure of the Japanese market for a national boliday, and the celebration of Lincoln's birthday by some US states also contributed to a quiet trading dav.

Near midday, the new 30year Treasury bond auctioned last Thursday was & higher at 98% to yield 6.077 per ceot, while at the short end of the maturity spectrum the twoyear note was up 1 at 100 m yielding 4.830 per cent.

The primary dealers which bid for the \$44.7bn of new three, 10 and 30-year paper last week, were distributing the securities to end-investors. Until that paper has beeo cleared off the dealers' books. traders said, the market may lack any clear direction.

Traders were also nervous uncertainty in the bund marahead of today's release of the employment cost index, which they fear could show a faster rise in wages in the fourth quarter. That could cause inflation worries and raise doubts over when the next cut interest rates might come. The Public Securities Associ-

"There is little potential in ation said foreign buying of Treasury bonds surged in the third quarter of last year to the highest percentage since 1978. Foreign holders owned nearly 30 per cent of the \$3,000bn marexpects the bond to have a 6%

European government bond markets fell in quiet trading with little to give a strong lead, although the Italy slipped on domestic worries.

ket, the PSA said.

German honds fell as investors staved on the sidelines after last week's volatility. The caution seems set to continue, at least until M3 figures are released next week. Among factors causing

ket, traders pointed to concern over the depth and range of interest rata easing, today's auction and the possibility of the end of fixed rate repos and tled at 121.75, down 0.04 while a return to variable rates, with doubts over European mone-March Pibor settled at 95.55, down 0.02. tary union clouding the longer-The yields on both one-year term picture. paper and 10-year boods rose

by 3 basis points, with the the near term for the market to go up," said one trader. GOVERNMENT Today'a auction is for up to DM12bn of a 10-year bund, and BONDS Mr Christoph Anhamm, an analyst at UBS in Frankfurt, spread between the maturities

per coupon. The Bundesbank Council meets on Thursday, at 202 points. The spread of 10-year paper over hunds was static at 40 basis points. and this week may also see a return to variable repos. Italian bonds underper-The yield on two-year paper formed Germany and futures

rose by 2 basis points and that on 10-year paper by 4 basis points, with the spread between the two maturities settling at 237 basis points. On Liffe, the March 10-year bund future closed at 98.85, down 0.06. The yield spread of 10-year bunds over Treasuries on two-year paper rose 17 basis points while that on nine-year French government bonds bonds rose 16 points, with the slipped in line with bunds, and spread between the two matuon Matif the March future set-

rities at 107 basis points. Mr Steven Major, an analyst at Crédit Lyonnais in Paris, said a fall of one percentage point in BTPs was not unusual, but added: "It is unlikely that the market will fall much forther.

The market needs to see the negotiations form a government so there doesn't need to be an election, which will add an interminable amount of time to the process." The yield on two-year paper rose by 17 basis points and that on nine-year boods by 16

points. with the spread betweeo the maturities at 107 points. The spread over 10-year bunds rose by 13 basis points to 427 points, while the spread of Spanish paper over bunds tightened by 2 points to 360 ers positioned themselves points.

10-year bunds over Treasuries On Liffe, the March future UK government boods had a shead of today's decision on a rose 2 basis points to 41 points. fell 1.05 to 111.29, and the yield quiet day but rose against cut in the reportate. bunds, with the 10-year spread tightening by 3 basis points to 160 points. The March future on Liffe closed up 3 at 1093 in low volume of 38,000 contracts, while in the cash market the yield on two-year and on 10-year paper rose 1 basis point. January producer price statistics were lower than expected. "Underlying inflation is virtually collapsing in the manufacturing sector," said Mr Don Smith at HSBC Markets. Mr Simon Briscoe at Nikko said the figures were a promis-ing background to the Bank of England inflation report, due tomorrow. "It is encouraging that companies have not tried to force through higher prices in tha wake of the base rate cut and stories of stronger retail parformance over the Christmas period," he said.

The yield on short-dated paper fell 7 basis points while on nine-year bonds it rose 1 point, with 123 basis points between the maturities. The apread over 10-year bunds tightened by 2 basis points to 265 points.

Mr Jonathan Davies at UBS said the Riksbank had room for a cut, perhaps of 25 basis points, since statistics were showing evidence of slowing inflationary pressures. A deci-sion to hold the current repo rate could result in a sell-off at the short end, he said. However, Mr Michael Dicks

at J.P. Morgan said a cut might fuel uncertainty, since it would take the repo rate to the bottom of the range over which the Riksbank governor has autonomy. Making such a move without shifting tha publicly-announced range might suggest that not all The Swedish government yield curve steepened as trad-Riksbank board members were in favour of cutting, he said.

Better credit standing helps Finland

By Antonia Sharpe

Finland reaped the benefits of its efforts to improve its standing with investors yesterday when it launched a \$10n 10year global bond offering.

The deal, its first in dollars since 1994, is set to be priced today at 36 to 37 basis points over US Treasuries. This compares with a launch spread of 55 basis points on its old 10year dollar bond dne 2004, which is trading at about 31 to

33 basis points over Treasuries. Morgan Stanley. which arranged the offering, said the spread reflected the market's improved perception of Fin-land's credit. The country is rated AA2 by Moody's and double-A minus by Standard & Poor's, which also has a positive ontlook on the rating.

Since 1992, Finland's government deficit has fallen from 12 points over US Treasuries.

per cent of gross domestic product to about 8 per cent. It has also reduced its foreign currency debt by relying more on its domestic bond market. Morgan Stanley said most of the demand for the paper had come from Europe and the US but that the issue would also ba marketed overnight in Japan and Asia.

INTERNATIONAL BONDS

International demand for 10year dollar paper remains firm, which should encourage more issuers to tap this part of the yield curve. The Inter American Development Bank is believed to be looking to raise \$1bn through a 10-year global bond offering, with pricing rumoured at about 24 basis

Elsewhere, the D-Mark and lira sectors of the eurobond market remained well-bld for emerging market paper, prompting the Province of Buenos Aires to launch a DM250m offering of five-year eurobonds and Telebras to launch L150hn of europonds due 1999 fungible with an outstanding issue of L350bn. The Buenos Aires deal, its second in D-Marks, was priced to yield 525 basis points over

five-year German government paper - which offered investors a significant pick-up over Argentina's outstanding D-Mark bonds which were trading at a spread of 360 basis points yesterday. CS First Boston, which arranged the deal, said the 10

per cent conpon was what investors were after. The main demand for the bonds came from retail investors in Swit-

zarland, Germany and th Benelux countries.

slipped more than a point on

concern that Mr Antonio Mac-

canico, prime minister desig-nate, would not be able to form

a government and elections

may have to be called to decide

the issue.

Syndicate managers believ Venezuela is close to launching a five-year D-Mark issue o between DM300m and DM500m Other emerging market name could also tap the market for D-Marks or lire.

Today, the D-Mark sector should see a DMIbn five-year offering from Landesgirokass Stuttgart, the second larges savings bank in Germany and the first to tap the interna tional bond markets. Dealer expect the bonds to be priced to yield 40 basis points over German government paper. Uncertainty over the direct

tion of the German bond mar ket prompted Merrill Lynch to launch a DM200m floating rate note issue due 2000. The boods which carry a margin of 25 basis points over three-month Libor, were bought by inves-

nice.

Nervousness about political (all-ont from Lord Justice Scott's forthcoming report on the "arms to Iraq" affair undermined sterling yesterday, dom-inating a day of subdued activity on the foreign exchanges. The US dollar weakened e little but continued trading in a fairly narrow range against the D-mark, with few fireworks expected here until the publication of the next set of Ger-man-money supply figures. Trading in the yen was quiet

The dollar closed 0.49 pfen-nigs weaker at DM1.4725 and 0.41 ven weater at Y106.555. Mr Poper providence prince asked to the load a story which the Jim O'Neill, chief currency economist at Goldman Sachs, predicted that the dollar would pick up over the next six months to DM1.55 and Y112. Constant for which in the feet is 5 test The French franc meanwhile

single European currency \$1.53 and DM2.2550 barriers at might have to be rethought if one stage in the morning but too few countries qualified in time for the proposed start.

The pound began the day in poor shape, in part because of a kneejerk reaction to the IRA bomb in London's Canary Wharf area on Friday night. But analysts said that the publication of the Scott report, due on Thursday afternoon, was acting as a more significant drag on the pound. Dealers fear that criticisms of ministers will further undermine the government's popularity,

lor, to use economic policy to lift the "feel-good factor" The pound slipped below

franc ended the day at FFr3.439 view on the outlook for Emu. to the D-mark, down from FFr3.435 at Friday's close. The lira came under some

However, the unexpected candour of Mr Juppe's comments - made after a meeting with German chancellor Mr Helmut Kohl - was later put discussions at the weekend. down to an error by the official translator at the press confer-ence. Mr Juppé in fact said that countries which did not quality in time for the original from L1061 at Friday's close. start date would have a fresh chance to qualify later. We know what will happen in 1999," he said. "If some countries do not make the grade, other dates are provided

for in the treaty. France and

Germany will not make Emu

alone - other countries will

make the 1998-9 appointment".

the lira remains one of the best buys in the currency market. He argued that it was well below its "equilibrium" level of around L782 and predicted that the Italian currency would be trading at L970 to the D-mark in six months' time.

Mr Steve Barrow, economist

There's a stronger hedge around Europe.

LIFFE's Three Month ECU Future. The European hedge.

On 19 December 1995 LIFFE's Designated Market Maker scheme for the Three Month ECU Future was renewed. effective until 17 June 1996, with an improved level of commitment from Designated Market Makers.

Now established as the world's leading ECU money market derivatives Exchange, LIFFE continues to offer a solid hedge value with the flexibility and liquidity you need.

With eight delivery months and five committed market makers, this is one hedge with strong roots.

For full details on LIFFE's Three Month ECU Future and its new Designated Market Makers scheme, please contact Marco Bianchi or Cinzia Bottecchi at LIFFE (Tel. +44 171 379 2762/2467) or E-mail: advertising.info@liffe.com. Alternatively, find out more about LIFFE on our Web site: http://www.liffe.com/

LONDON STOCK EXCHANGE

MARKET REPORT Wall St surge helps Footsie recover early loss

· 🛨

By Steve Thompson, **UK Stock Market Editor**

30

relatively comforting performance hy gilts and another powerful opening by Wall Street helped London's equity market negotiate fairly successfully the first session of what could be a very tricky week.

The Dow Jones Industrial Average raced up 35 points within minutes of the opening yesterday and advanced further to show a 50 points-plus gain an hour after London closed for husiness.

But the market had to endure some uncomfortable moments early in the session as marketmakers

took avoiding action in the wake of the IRA bombing ontrage last Fri-day and ahead of Thursday's publication of the Scott report into the "arms-for-Iraq" affair. Both events were viewed as hav-

ing potential to cause severe damage to market sentiment. A resumption of the IRA's bombing campaign on the mainland was viewed as extremely bearish for the leisure/ hotels industry.

The FT-SE 100 index closed the day a net 10.3 firmer at 3,726.6, recovering from a weak opening. but the FT-SE Mid 250 proved a disappointment, only just managing to end in positive territory, up 0.3 at 4,152.2. At one point the Mid 250

looked set to launch a determined challenge to its previous all-time high. 4.152.8, achieved in 1994. Dealers said the second-line stocks were being held back hy fear of more profits warnings emerging

in the March reporting season. There was comfort in the day's economic news, which revealed a smaller than expected rise in producer prices, reviving hopes that a further reduction in UK interest rates may not be too far away. The data belped gilts, which held steady in a narrow trading range.

Senior marketmakers said they expected London to continue to make progress, as long as Wall Street held up. "There was very lit-

tle selling pressure after an early flurry, and plenty of buyers came in during the afternoon," said one trader. A leading marketmaker at a European securities house said the market attracted bnyers just below the 3,700 mark on the Footsie.

There were also rumblings of more takeover activity and that the electricity sector, which has seen a number of false starts in the past few weeks, would be the target of the next big hid. Northern Electric, which was the first of the "recs" to attract a predator when Trafalgar House launched its unsuccessful bid for the group in 1994, was the name being mentioned late in the session. opening, the Footsie showed an 18.9 points decline, with much of the initial selling said to have been the residue of a sell-side programme started late on Friday. Once that selling was done, the market began to stabilise.

The best individual performance in the Footsie came from Blue Circle, which responded to a stock sbortage, while on the downside, Granada was badly affected by the IRA hombing. British Petroleum moved up amid hopes that today's fourth-quarter figures may include an increase in the dividend.

Turnover at opm was a respectable 650,5m shares. Customer business on Friday was valued at £2bn.

news that the group was closrecovered to close just a penny ing in on a \$500m Thai steel off at 169p, as takeover speculation among casino groups mill contract. boosted related stocks yest-A story in the weekend press suggested two US casino groups have beld talks with British casino operators about a possible takeover. Ladbroke re-entered the UK casino market in 1994 with the purchase of three London casinos, and last week it added a fourth with the acquisition of London's Barracuda casino from Stakis, the Glasgow based hotels and casinos group. Stakis closed 2 ahead at S9p. Among other casino operators, London Clubs appreciated 13 to

499p. while Capital Corporation gained 8 at 226p. Backers of BT, the day's most active Footsie stock, claimed to have spotted a subtle change in sentiment yesterday.

The shares moved ahead as talk suggested that the odds on the telecoms giant successfully battling its way through the regulatory morass appeared to shorten a touch. They finished 4 up at 365! p in 20m turnover. Some 25p above their January low, the shares look to have pinned their colours to Sir Peter Bonfield's skills as a mediator. BT faces a number of challenges on pricing from Oftel, the industry regulator. There is suspicion in the market that the new chief executive may be just the man to pull it off.

Among conglomerates, Hanson, which has been bumping along close to its low for some days, dipped 21/2 to 1850 ahead tomorrow's third-quarter of results. A total of 8m shares were traded

Williams Holdings eased a further 3 to 332p. The group has been subject recently to talk of a cautious statement when it puts out 1995 results

What looked to be positive news for Eurotunnal mostly came too late for share markets. The announcement of two heavyweight names to mediate in the Channel tunnel operator's debt negotiations left the shares unchanged at 84p. In Paris, the stock traded within a range of 55 centimes and ran Feb Mar Apr May up volume of 2.3m shares. South East Asia impinged upon leading engineers yesterday, with GEN gaining ground on news of a South Korean joint venture and Rolls-Royce advancing almost 3 per cent on Feb Mar Apr Jun revived talk of positive spinoffs from the recent Singapore Air Show.

GKN moved up 12 to 827p and R.R. the third hest performing Footsie stock, gained 6 at 212p in turnover of 14m. TI Group shed 2 to 466p after take profits advice from Merrill Lynch, which moved from hold

to sell on the shares. The broker also turned cautious on Glynwed, switching from buy to hold after trimming profits estimates by £6m to £96m. The shares lost 44 at 329p.

IRA fears hit hotel shares

Friday's IRA bombing in London's Docklands prompted worries about the likely impact on hotel businesses should international travellers choose to stay away from the UK for fear of further bombings.

Among the day's biggest casualties was Granada Group, which last month acquired Forte, the country's largest boteis business.

The shares resisted the firm market trend to close 12 down at 712p, one of the day's worst performers in the Footsie.

One dealer said: "There are genuine fears about tourists. particularly from the US, deciding not to come to the UK for fear of the bombings. However, there has also been some indigestion in the market and there are those that have simply chosen to take profits after the recent run in the share price.

Other stocks that came under pressure on the worries included Jurys Hotel Group. fell 7 to 224p.

N Ire Elec concern

Northern Ireland Electricity suffered badly in the aftermath of the docklands bomb attack. Shares in the regional electricity company slid as at least

two brokers were said to have lowered their stance. Mr Mike Hilton, a utilities analyst with Charterhouse Til-

ney, moved his recommenda-

come restrictions in its articles tion from buy to hold, arguing of association by merging with that the increased cost of security would hit company profits. a mutual. He also believes that if the fragile peace is over, investshare price has risen by 32 per cent over the past six months ment in the province could die and outperformed the FT-SE-A away and so could demand for electricity. Dealers said BZW All-Share index by more than 20 per cent over the same also downgraded. However, ABN Amro Hoare

Downtick rule Lack of weekend agreement undermines Milan triggered as equities surge

Wall Street

-34

Leading US shares continued their record-breaking surge yesterday, with trading restrictions imposed by the New York Stock Exchange as the Dow Jones Industrial Average rose 50 points, writes Maggie Urry in New York.

Hopes of lower interest rates persuaded investors to pour more money into the market. Attention centred on stocks which benefit most from

cheaper money. Shortly before 1 pm, the Dow's rise exceeded 50 points, triggering the so called "downtick" rule limiting computer generated trading. At 1 pm the Dow was up 48.77 at 5,590.39. The broader Standard & Poor's 500 was 4.09 higher at 660.46 and the Nasdaq composite index had gained 2.51 at 1097.21. But the American Stock Exchange composite was softer at 562.47, off 1.54. Volume on the New York SE came to 220m shares.

The advance was led by the less glamorous stocks, cyclicals, conglomerates and indus-

trial groups. Within the Dow's 30 shares, Caterpillar, tha earth-moving equipment company, rosa \$1% to \$66%, Du Pont, the chemicals group, was up \$1% to \$79%, and the diversified Minnesota Mining & Manufacturing was \$1% higher at \$69%.

Motor stocks rose, with General Motors up \$1% to \$53%, a 2.4 per cent increase. Ford was ahead by \$% at \$30%, and Chrysler up \$1% to \$57.

Oil shares were firmer, contributing to tha Dow's rise.

There was no halting the surge

in CARACAS, which began last

week, and by late afternoon

the IBC index bad gained a fur-ther 9 per cent to 3,001.86. Bro-

kers remarked that the rise in

prices had been driven by a

sharp fall in yields on fixed

income paper which had

caused investors to look for alternativa places to invest.
